

Changes Around Us

MCQ

1. A change is defined as a difference in the

- A) Weight of an object
- B) Size or shape of an object
- C) Colour only
- D) Temperature only

Answer: B

2. Changes that can be reversed are called

- A) Chemical changes
- B) Permanent changes
- C) Reversible changes
- D) Irreversible changes

Answer: C

3. A change in which no new substance is formed is called

- A) Chemical change
- B) Physical change
- C) Nuclear change
- D) Permanent change

Answer: B

4. Which of the following is a physical change

- A) Rusting of iron
- B) Burning of wood
- C) Melting of ice
- D) Cooking of food

Answer: C

5. Chemical changes are generally

- A) Temporary
- B) Reversible
- C) Permanent
- D) Elastic

Answer: C

6. Rusting of iron is an example of

- A) Physical change
- B) Reversible change
- C) Chemical change
- D) Temporary change

Answer: C

7. Changes that cannot be reversed are called

- A) Physical changes
- B) Reversible changes
- C) Irreversible changes
- D) Elastic changes

Answer: C

8. Cutting of paper is a

- A) Chemical change
- B) Reversible change
- C) Physical change
- D) Permanent chemical change

Answer: C

9. Formation of a new substance occurs in

- A) Physical change
- B) Chemical change

C) Temporary change

D) Shape change

Answer: B

10. Chemical reactions are also known as

A) Physical reactions

B) Mechanical changes

C) Chemical changes

D) Nuclear reactions

Answer: C

11. Reactants are substances which

A) Are formed after reaction

B) Take part in a reaction

C) Never change

D) Are always gases

Answer: B

12. Products are substances which are

A) Used in reaction

B) Reactants

C) Formed after reaction

D) Always solids

Answer: C

13. Chemical reactions require

A) Always heat

B) Specific conditions

C) Only light

D) Only pressure

Answer: B

14. Contact between reactants is necessary for

- A) Physical change
- B) Chemical change
- C) Shape change
- D) Size change

Answer: B

15. Burning of wood requires

- A) Nitrogen
- B) Hydrogen
- C) Oxygen
- D) Carbon dioxide

Answer: C

16. A reaction that occurs only in solution is

- A) Melting
- B) Dissolving salt
- C) Silver nitrate with sodium chloride
- D) Cutting paper

Answer: C

17. Electrolysis involves the use of

- A) Heat
- B) Light
- C) Electricity
- D) Catalyst

Answer: C

18. Electrolysis of water produces

- A) Hydrogen and nitrogen
- B) Hydrogen and oxygen

C) Oxygen and carbon dioxide

D) Nitrogen and oxygen

Answer: B

19. Thermochemical reactions involve

A) Electricity

B) Light

C) Heat

D) Catalyst only

Answer: C

20. Reactions that release heat are called

A) Endothermic

B) Exothermic

C) Neutral

D) Physical

Answer: B

21. Endothermic reactions

A) Release heat

B) Absorb heat

C) Produce light

D) Produce sound

Answer: B

22. Photosynthesis requires

A) Electricity

B) Heat only

C) Light

D) Pressure

Answer: C

23. Photosynthesis converts light energy into

- A) Heat energy
- B) Mechanical energy
- C) Chemical energy
- D) Electrical energy

Answer: C

24. A catalyst

- A) Gets consumed in reaction
- B) Slows down reaction
- C) Speeds up reaction
- D) Changes products

Answer: C

25. Haber's process uses

- A) Copper
- B) Zinc
- C) Iron
- D) Aluminium

Answer: C

26. Spoilage of food is due to

- A) Physical change
- B) Chemical reactions
- C) Nuclear reactions
- D) Mechanical changes

Answer: B

27. Rancidity occurs due to

- A) Reduction
- B) Oxidation

- C) Neutralisation
- D) Decomposition

Answer: B

28. Browning of apple is due to reaction with

- A) Nitrogen
- B) Carbon dioxide
- C) Oxygen
- D) Hydrogen

Answer: C

29. The enzyme responsible for browning is

- A) Amylase
- B) Pepsin
- C) Tyrosinase
- D) Lipase

Answer: C

30. Pollution is an

- A) Useful change
- B) Wanted change
- C) Unwanted change
- D) Temporary change

Answer: C

31. Rusting requires

- A) Only oxygen
- B) Only water
- C) Water and oxygen
- D) Carbon dioxide

Answer: C

32. Rust is chemically

- A) Iron sulphide
- B) Iron oxide
- C) Iron carbonate
- D) Iron nitrate

Answer: B

33. Tarnishing of silver forms

- A) Silver oxide
- B) Silver sulphide
- C) Silver chloride
- D) Silver nitrate

Answer: B

34. Brass turns green due to formation of

- A) Copper oxide
- B) Copper sulphate
- C) Copper carbonate
- D) Copper nitrate

Answer: C

35. Exothermic reactions produce

- A) Cold
- B) Heat
- C) Only sound
- D) Only pressure

Answer: B

36. Chemiluminescence involves production of

- A) Heat
- B) Sound

- C) Light
- D) Pressure

Answer: C

37. Burning of magnesium produces

- A) Only heat
- B) Only sound
- C) Bright light and heat
- D) Pressure only

Answer: C

38. Hydrogen burning produces a

- A) Hissing sound
- B) Ringing sound
- C) Pop sound
- D) No sound

Answer: C

39. Potassium reacts with water producing

- A) No sound
- B) Pop sound
- C) Light only
- D) Pressure only

Answer: B

40. Gas formation in a closed container causes

- A) Cooling
- B) Decrease in pressure
- C) Increase in pressure
- D) No change

Answer: C

41. Fireworks burst due to

- A) Heat only
- B) Pressure build-up
- C) Light only
- D) Sound only

Answer: B

42. Pollution affecting air is called

- A) Water pollution
- B) Land pollution
- C) Air pollution
- D) Noise pollution

Answer: C

43. Chemical changes often involve

- A) Shape change only
- B) Formation of new substance
- C) Temporary effect
- D) No energy change

Answer: B

44. Melting of ice is a

- A) Chemical change
- B) Irreversible change
- C) Physical change
- D) Permanent change

Answer: C

45. Burning of paper is

- A) Reversible change
- B) Physical change

- C) Chemical change
- D) Temporary change

Answer: C

46. Cutting vegetables causes

- A) Nuclear change
- B) Physical change
- C) Chemical change
- D) No change

Answer: B

47. Decay of fruits is caused by

- A) Heat only
- B) Microbes
- C) Light only
- D) Electricity

Answer: B

48. Chemical reactions may produce

- A) Only solids
- B) Only liquids
- C) Energy
- D) Nothing

Answer: C

49. Endothermic reactions cause

- A) Rise in temperature
- B) Fall in surrounding temperature
- C) No temperature change
- D) Explosion

Answer: B

50.Change is said to be constant because

- A) It never happens
- B) It happens sometimes
- C) Everything undergoes change
- D) Only chemicals change

Answer: C
