

Changes around us

MCQs: Changes Around Us

1. A change is defined as

- a) Growth of living beings
- b) Difference between initial and final state
- c) Only chemical reactions
- d) Only visible movement

Answer: b

2. Which of the following is an example of change in shape?

- a) Burning of paper
- b) Rusting of iron
- c) Folding a paper
- d) Ripening of fruits

Answer: c

3. Which change takes place continuously in our life?

- a) Rusting
- b) Ageing
- c) Melting
- d) Burning

Answer: b

4. Which change occurs daily and seasonally?

- a) Germination
- b) Weather change
- c) Rusting
- d) Baking

Answer: b

5. Milk turning into curd is an example of a

- a) Fast change
- b) Slow change
- c) Reversible change
- d) Physical change

Answer: b

6. Which property does NOT change during a physical change?

- a) Shape
- b) Size
- c) Chemical composition
- d) Appearance

Answer: c

7. Which change takes more time?

- a) Burning paper
- b) Bursting balloon
- c) Rusting of iron
- d) Breaking glass

Answer: c

8. Rusting of iron is a

- a) Fast physical change
- b) Slow chemical change
- c) Reversible change
- d) Temporary change

Answer: b

9. Drying of fish is an example of

- a) Fast change
- b) Reversible change
- c) Slow change
- d) Undesirable change

Answer: c

10. Which of the following is a slow change?

- a) Earthquake
- b) Volcano eruption
- c) Nail growth
- d) Breaking glass

Answer: c

11. Bursting of a balloon is a

- a) Slow change
- b) Reversible change
- c) Fast change
- d) Desirable change

Answer: c

12. Which change happens in seconds?

- a) Rusting
- b) Seed germination
- c) Balloon bursting
- d) Ageing

Answer: c

13. Burning of paper is a

- a) Physical change
- b) Reversible change
- c) Chemical change
- d) Temporary change

Answer: c

14. Which of the following is NOT a fast change?

- a) Flood
- b) Landslide
- c) Nail growth
- d) Earthquake

Answer: c

15. Reversible changes are those which

- a) Form new substances
- b) Cannot be undone
- c) Can return to original state
- d) Are always fast

Answer: c

16. Which is a reversible change?

- a) Burning candle

- b) Rusting
- c) Melting of ice
- d) Baking roti

Answer: c

17. Stretching a rubber band is a

- a) Chemical change
- b) Irreversible change
- c) Reversible change
- d) Undesirable change

Answer: c

18. Folding a paper is an example of

- a) Irreversible change
- b) Physical change
- c) Chemical change
- d) Slow change

Answer: b

19. Which change is irreversible?

- a) Melting ice
- b) Freezing water
- c) Burning paper
- d) Stretching rubber

Answer: c

20. Baking a roti is an example of

- a) Physical change
- b) Reversible change
- c) Chemical change
- d) Temporary change

Answer: c

21. Which process becomes irreversible after baking clay?

- a) Shaping clay
- b) Rolling clay
- c) Pot making

d) Kneading clay

Answer: c

22. When a substance expands on heating, it is called

a) Contraction

b) Expansion

c) Freezing

d) Melting

Answer: b

23. Metals generally ____ on heating.

a) Shrink

b) Break

c) Expand

d) Dissolve

Answer: c

24. Contraction occurs when a substance is

a) Heated

b) Burnt

c) Cooled

d) Melted

Answer: c

25. Which change involves change in state of matter?

a) Rusting

b) Burning

c) Freezing

d) Rotting

Answer: c

26. Freezing is the process of

a) Solid to liquid

b) Liquid to gas

c) Liquid to solid

d) Gas to liquid

Answer: c

27. Ice turning into water is called

- a) Freezing
- b) Condensation
- c) Evaporation
- d) Melting

Answer: d

28. Evaporation is the change of

- a) Solid to gas
- b) Liquid to gas
- c) Gas to liquid
- d) Solid to liquid

Answer: b

29. Water vapour changing into water droplets is

- a) Melting
- b) Freezing
- c) Condensation
- d) Sublimation

Answer: c

30. Which process skips the liquid state?

- a) Evaporation
- b) Condensation
- c) Sublimation
- d) Freezing

Answer: c

31. Camphor changing directly into vapour shows

- a) Evaporation
- b) Melting
- c) Sublimation
- d) Condensation

Answer: c

32. Which of the following shows sublimation?

- a) Ice

- b) Camphor
- c) Water
- d) Milk

Answer: b

33. In a solution, the substance that dissolves is called

- a) Solvent
- b) Solute
- c) Residue
- d) Mixture

Answer: b

34. Water is called a solvent because it

- a) Dissolves substances
- b) Changes colour
- c) Forms gas
- d) Becomes solid

Answer: a

35. Sugar dissolved in water forms a

- a) Compound
- b) Suspension
- c) Solution
- d) Element

Answer: c

36. Dissolving sugar in water is a

- a) Chemical change
- b) Physical change
- c) Irreversible change
- d) Undesirable change

Answer: b

37. Physical changes are generally

- a) Permanent
- b) Irreversible
- c) Temporary

d) Harmful

Answer: c

38. Which change forms a new substance?

a) Folding paper

b) Melting ice

c) Burning candle

d) Stretching rubber

Answer: c

39. Chemical changes are also called

a) Temporary changes

b) Reversible changes

c) Permanent changes

d) Physical changes

Answer: c

40. Which is NOT a physical change?

a) Freezing water

b) Melting ice

c) Burning paper

d) Stretching spring

Answer: c

41. Desirable changes are those which are

a) Harmful

b) Useful

c) Sudden

d) Fast

Answer: b

42. Which of the following is a desirable change?

a) Earthquake

b) Flood

c) Cooking food

d) Rusting

Answer: c

43. Preparation of curd is a

- a) Undesirable change
- b) Natural disaster
- c) Desirable change
- d) Fast change

Answer: c

44. Undesirable changes are

- a) Always useful
- b) Always reversible
- c) Harmful to us
- d) Always slow

Answer: c

45. Which is an undesirable change?

- a) Germination
- b) Ripening fruits
- c) Rotting food
- d) Baking cake

Answer: c

46. Floods and earthquakes are

- a) Desirable changes
- b) Undesirable changes
- c) Man-made changes
- d) Physical changes

Answer: b

47. Natural changes occur

- a) Due to humans
- b) Only in labs
- c) On their own
- d) Only in factories

Answer: c

48. Which is a natural change?

- a) Cooking food

- b) Building roads
- c) Rainfall
- d) Making jewellery

Answer: c

49. Rotation of earth causes

- a) Rusting
- b) Day and night
- c) Flood
- d) Pollution

Answer: b

50. Which is NOT a natural change?

- a) Sunrise
- b) Wind
- c) Cooking vegetables
- d) Rain

Answer: c

51. Man-made changes are caused by

- a) Nature
- b) Animals
- c) Humans
- d) Weather

Answer: c

52. Cutting trees to make furniture is a

- a) Natural change
- b) Man-made change
- c) Physical change
- d) Chemical change

Answer: b

53. Construction of buildings is a

- a) Natural change
- b) Desirable change
- c) Man-made change

d) Chemical change

Answer: c

54. Which of the following is man-made?

a) Wind

b) Rain

c) Vehicles

d) Sunrise

Answer: c

55. Jewellery making is an example of

a) Natural change

b) Man-made change

c) Undesirable change

d) Fast change

Answer: b

56. Which change affects chemical composition?

a) Physical change

b) Chemical change

c) Reversible change

d) Temporary change

Answer: b

57. Burning of candle wax involves

a) Only physical change

b) Only chemical change

c) Both physical and chemical changes

d) No change

Answer: c

58. Rust is formed due to reaction with

a) Water only

b) Oxygen only

c) Air and moisture

d) Heat

Answer: c

59. Ageing is a

- a) Fast change
- b) Reversible change
- c) Natural slow change
- d) Man-made change

Answer: c

60. Growing crops is a

- a) Fast change
- b) Slow change
- c) Undesirable change
- d) Chemical change

Answer: b

61. Which change happens in minutes?

- a) Rusting
- b) Ageing
- c) Cooking vegetables
- d) Seed germination

Answer: c

62. Breaking a glass is a

- a) Reversible change
- b) Slow change
- c) Fast irreversible change
- d) Natural change

Answer: c

63. Which change can be undone?

- a) Burning paper
- b) Rusting iron
- c) Freezing water
- d) Baking cake

Answer: c

64. Seasonal changes are

- a) Man-made

- b) Undesirable
- c) Natural
- d) Chemical

Answer: c

65. Softening of vegetables while cooking is a

- a) Slow change
- b) Fast change
- c) Natural change
- d) Reversible change

Answer: b

66. Which is both slow and irreversible?

- a) Rusting
- b) Melting
- c) Freezing
- d) Stretching

Answer: a

67. Which change affects only appearance?

- a) Chemical change
- b) Physical change
- c) Undesirable change
- d) Natural change

Answer: b

68. Naphthalene balls disappear due to

- a) Evaporation
- b) Condensation
- c) Sublimation
- d) Freezing

Answer: c

69. Changes that cannot be seen easily are

- a) Always slow
- b) Always fast
- c) Sometimes difficult to detect

d) Never occur

Answer: c

70. Which property may change in a physical change?

a) Chemical formula

b) Composition

c) Shape

d) Nature of substance

Answer: c

71. Which is NOT an example of desirable change?

a) Germination

b) Cooking food

c) Rusting iron

d) Baking cake

Answer: c

72. Earthquake is a

a) Desirable change

b) Man-made change

c) Undesirable natural change

d) Physical change

Answer: c

73. Which change is temporary?

a) Rusting

b) Burning

c) Melting ice

d) Rotting

Answer: c

74. Which process produces gases and ash?

a) Sublimation

b) Burning incense stick

c) Melting ice

d) Condensation

Answer: b

75. Which change is permanent?

- a) Folding paper
- b) Freezing water
- c) Burning paper
- d) Stretching rubber

Answer: c

76. Formation of rocks is a

- a) Fast man-made change
- b) Slow natural change
- c) Undesirable change
- d) Physical change

Answer: b

77. Which change occurs due to heating?

- a) Condensation
- b) Freezing
- c) Expansion
- d) Contraction

Answer: c

78. Shrinking of metal on cooling is called

- a) Expansion
- b) Evaporation
- c) Condensation
- d) Contraction

Answer: d

79. Which change involves human effort?

- a) Rain
- b) Wind
- c) Cooking food
- d) Sunrise

Answer: c

80. Changes around us show that

- a) Nothing changes

b) Only living things change

c) Change is constant

d) Changes are rare

Answer: c
