

Chemistry in Everyday Life

MCQs

1. Chemistry deals with the study of
 - a) Living organisms only
 - b) Numbers and calculations
 - c) Composition and properties of substances
 - d) Stars and planets

Answer: c

2. Chemistry is present in our daily life because
 - a) It is studied only in labs
 - b) It is used only by scientists
 - c) Everything around us involves chemicals
 - d) It is used only in industries

Answer: c

3. Which of the following shows chemistry in everyday life?
 - a) Food we eat
 - b) Soap we use
 - c) Clothes we wear
 - d) All of these

Answer: d

4. Soap and detergents are
 - a) Insoluble in water
 - b) Water-soluble compounds
 - c) Gases
 - d) Acids

Answer: b

5. The process used to make soap is called
 - a) Neutralization
 - b) Oxidation
 - c) Saponification
 - d) Combustion

Answer: c

6. Soaps are made using salts of

- a) Sugar
- b) Fatty acids
- c) Alcohol
- d) Proteins

Answer: b

7. Detergents are also known as

- a) Solvents
- b) Surfactants
- c) Catalysts
- d) Polymers

Answer: b

8. Detergents help in cleaning by reducing

- a) Temperature
- b) Density
- c) Surface tension of water
- d) Volume

Answer: c

9. Surface tension is due to

- a) Adhesive forces
- b) Cohesive forces
- c) Magnetic forces
- d) Gravitational forces

Answer: b

10. Surface molecules of water

- a) Move outward
- b) Have no force
- c) Experience inward force
- d) Break easily

Answer: c

11. Which example shows surface tension?

- a) Stone sinking in water

- b) Mosquito walking on water
- c) Sugar dissolving
- d) Ice melting

Answer: b

12. A paper clip floats on water due to

- a) Density
- b) Pressure
- c) Surface tension
- d) Heat

Answer: c

13. The water-loving part of soap is called

- a) Hydrophobic
- b) Hydrophilic
- c) Neutral
- d) Acidic

Answer: b

14. The water-repelling part of soap is called

- a) Hydrophilic
- b) Hydrophobic
- c) Soluble
- d) Ionic

Answer: b

15. Dirt usually contains

- a) Water
- b) Oil and grease
- c) Sugar
- d) Salt

Answer: b

16. Micelles are formed due to

- a) Soap molecules only
- b) Water molecules only
- c) Arrangement of soap molecules around dirt

d) Heating water

Answer: c

17. The hydrophobic tail of soap attracts

a) Water

b) Oil

c) Air

d) Salt

Answer: b

18. The cleansing action of soap occurs due to

a) Evaporation

b) Micelle formation

c) Filtration

d) Sedimentation

Answer: b

19. Fertilizers provide

a) Water to plants

b) Oxygen to plants

c) Essential nutrients to plants

d) Shade to plants

Answer: c

20. Which nutrient promotes rapid plant growth?

a) Phosphorus

b) Potassium

c) Nitrogen

d) Sulphur

Answer: c

21. Potassium helps plants in

a) Seed formation only

b) Disease resistance

c) Water absorption only

d) Photosynthesis only

Answer: b

22. Phosphorus helps in

- a) Leaf colour
- b) Root and seed formation
- c) Water storage
- d) Respiration

Answer: b

23. Fertilizers are classified into

- a) Liquid and solid
- b) Acidic and basic
- c) Organic and inorganic
- d) Natural and gaseous

Answer: c

24. Organic fertilizers are obtained from

- a) Natural sources
- b) Chemical factories
- c) Petroleum
- d) Metals

Answer: a

25. Which is an organic fertilizer?

- a) Urea
- b) Compost
- c) Ammonium nitrate
- d) Superphosphate

Answer: b

26. Vermicomposting uses

- a) Bacteria
- b) Fungi
- c) Earthworms
- d) Insects

Answer: c

27. Earthworms are called farmer's friend because they

- a) Eat crops

- b) Increase soil fertility
- c) Destroy weeds
- d) Reduce rainfall

Answer: b

28. Vermicompost improves

- a) Soil texture
- b) Water holding capacity
- c) Plant growth
- d) All of these

Answer: d

29. Organic fertilizers increase

- a) Soil pollution
- b) Carbon content of soil
- c) Chemical toxicity
- d) Soil erosion

Answer: b

30. Inorganic fertilizers are also called

- a) Organic manure
- b) Natural waste
- c) Chemical fertilizers
- d) Biofertilizers

Answer: c

31. One advantage of inorganic fertilizers is

- a) Slow action
- b) Fast results
- c) Improves soil texture permanently
- d) Eco-friendly

Answer: b

32. A disadvantage of inorganic fertilizers is

- a) Increase soil fertility
- b) Improve soil microbes
- c) Pollute underground water

d) Increase humus

Answer: c

33. Cement is made from

- a) Wood and sand
- b) Lime, clay and gypsum
- c) Plastic and stone
- d) Iron and coal

Answer: b

34. Cement becomes hard when mixed with

- a) Oil
- b) Water
- c) Acid
- d) Air

Answer: b

35. Gypsum is added to cement to

- a) Increase colour
- b) Reduce strength
- c) Control setting time
- d) Make it lighter

Answer: c

36. Mortar is made by mixing

- a) Cement and gravel
- b) Cement and sand
- c) Cement and iron
- d) Cement and clay

Answer: b

37. Concrete is made using

- a) Cement and water
- b) Cement and sand
- c) Cement, sand and gravel
- d) Cement and gypsum

Answer: c

38. RCC stands for

- a) Reinforced Cement Concrete
- b) Ready Cement Compound
- c) Rapid Concrete Cement
- d) Reinforced Clay Cement

Answer: a

39. Chemical formula of gypsum is

- a) CaSO_4
- b) $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$
- c) $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$
- d) CaCO_3

Answer: b

40. Plaster of Paris is made by heating

- a) Cement
- b) Limestone
- c) Gypsum
- d) Sand

Answer: c

41. Formula of Plaster of Paris is

- a) CaSO_4
- b) $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$
- c) $\text{CaSO}_4 \cdot \frac{1}{2}\text{H}_2\text{O}$
- d) $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$

Answer: c

42. Epsom salt is

- a) Calcium sulphate
- b) Sodium chloride
- c) Magnesium sulphate
- d) Potassium nitrate

Answer: c

43. Epsom salt helps in

- a) Cleaning clothes

- b) Relaxing muscles
- c) Making cement
- d) Cooking food

Answer: b

44. Phenol is also known as

- a) Vinegar
- b) Carbolic acid
- c) Sulphuric acid
- d) Ethanol

Answer: b

45. Phenol is used mainly as

- a) Fertilizer
- b) Disinfectant
- c) Fuel
- d) Food additive

Answer: b

46. Phenol should be handled carefully because it

- a) Is sweet
- b) Is non-reactive
- c) Can irritate skin
- d) Is harmless

Answer: c

47. Adhesives are used to

- a) Clean surfaces
- b) Stick objects together
- c) Kill germs
- d) Paint walls

Answer: b

48. Adhesives made from starch are

- a) Artificial adhesives
- b) Synthetic adhesives
- c) Natural adhesives

d) Chemical adhesives

Answer: c

49. Which is a form of artificial adhesive?

a) Manure

b) Paste

c) Compost

d) Gypsum

Answer: b

50. Pressure-sensitive adhesives stick when

a) Heated

b) Cooled

c) Pressed

d) Mixed with water

Answer: c
