

Chemistry in Everyday Life

MCQ

1. Chemistry in everyday life mainly helps us understand

- a) Only laboratory reactions
- b) Natural disasters
- c) Daily activities and materials
- d) Space science

Answer: c) Daily activities and materials

2. Medicines are mainly used to

- a) Increase height
- b) Improve taste of food
- c) Treat diseases
- d) Produce energy

Answer: c) Treat diseases

3. Which is NOT a way of taking medicine?

- a) Oral use
- b) External use
- c) Injection
- d) Combustion

Answer: d) Combustion

4. Medicines help in

- a) Diagnosing diseases only
- b) Preventing diseases only
- c) Treating diseases only
- d) Diagnosing, treating and preventing diseases

Answer: d) Diagnosing, treating and preventing diseases

5. Liquid medicines are mainly given to patients who

- a) Are unconscious
- b) Cannot swallow tablets
- c) Are very old
- d) Have fever

Answer: b) Cannot swallow tablets

6. Tablets are

- a) Liquid medicines
- b) Semi-solid medicines
- c) Solid unit dosage forms
- d) Gas medicines

Answer: c) Solid unit dosage forms

7. Capsules are enclosed by

- a) Plastic
- b) Glass
- c) Water-soluble substances
- d) Rubber

Answer: c) Water-soluble substances

8. Medicines applied directly on skin are called

- a) Oral medicines
- b) Injectable medicines
- c) Topical medicines
- d) Liquid medicines

Answer: c) Topical medicines

9. Suppositories are inserted into

- a) Mouth

- b) Nose
- c) Rectum or vagina
- d) Ear

Answer: c) Rectum or vagina

10. Inhalers deliver medicine directly to the

- a) Stomach
- b) Blood
- c) Lungs
- d) Skin

Answer: c) Lungs

11. Medicines should be stored

- a) In open places
- b) Near children
- c) Away from infants
- d) In sunlight

Answer: c) Away from infants

12. ORS is used to treat

- a) Fever
- b) Pain
- c) Dehydration
- d) Allergy

Answer: c) Dehydration

13. ORS mainly contains

- a) Protein and fat
- b) Water, glucose and electrolytes
- c) Vitamins only

d) Antibiotics

Answer: b) Water, glucose and electrolytes

14. ORS is especially useful during

a) Cough

b) Headache

c) Diarrhea and vomiting

d) Allergy

Answer: c) Diarrhea and vomiting

15. ORS is safe for

a) Adults only

b) Children only

c) Elderly only

d) All age groups

Answer: d) All age groups

16. Osmosis is the movement of

a) Salt through membranes

b) Water through cell membranes

c) Blood through veins

d) Oxygen through lungs

Answer: b) Water through cell membranes

17. Osmosis helps maintain

a) Digestion only

b) Respiration only

c) Homeostasis

d) Circulation only

Answer: c) Homeostasis

18. Antacids are used to treat

- a) Fever
- b) Pain
- c) Acidity
- d) Infection

Answer: c) Acidity

19. Human stomach naturally produces

- a) Nitric acid
- b) Sulphuric acid
- c) Hydrochloric acid
- d) Acetic acid

Answer: c) Hydrochloric acid

20. Excess secretion of gastric acid causes

- a) Fever
- b) Acidity
- c) Infection
- d) Allergy

Answer: b) Acidity

21. Antacids are

- a) Strong acids
- b) Weak bases
- c) Neutral salts
- d) Strong acids

Answer: b) Weak bases

22. Which is an antacid?

- a) Sodium bicarbonate

- b) Citric acid
- c) Hydrochloric acid
- d) Sulphuric acid

Answer: a) Sodium bicarbonate

23. Long-term use of antacids may cause

- a) Improved digestion
- b) Diarrhea or constipation
- c) Fever
- d) Allergy

Answer: b) Diarrhea or constipation

24. Antipyretics are medicines that reduce

- a) Pain
- b) Allergy
- c) Fever
- d) Infection

Answer: c) Fever

25. Normal human body temperature is around

- a) 35°C
- b) 36.8–37°C
- c) 39°C
- d) 40°C

Answer: b) 36.8–37°C

26. Fever is usually caused by

- a) Injury
- b) Infection
- c) Allergy

d) Stress

Answer: b) Infection

27. Chemical released during infection that raises temperature is

a) Enzyme

b) Pyrogen

c) Hormone

d) Antibiotic

Answer: b) Pyrogen

28. Hypothalamus controls

a) Digestion

b) Breathing

c) Body temperature

d) Blood pressure

Answer: c) Body temperature

29. Antipyretics reduce fever by blocking

a) Histamine

b) Enzymes

c) Prostaglandins

d) Antibodies

Answer: c) Prostaglandins

30. Most commonly used antipyretic is

a) Ibuprofen

b) Aspirin

c) Paracetamol

d) Diclofenac

Answer: c) Paracetamol

31. Antibiotics are effective against

- a) Viruses
- b) Bacteria
- c) Fungi
- d) Allergens

Answer: b) Bacteria

32. Antibiotics do NOT work against

- a) Pneumonia
- b) Sore throat
- c) Cold
- d) Bacterial infection

Answer: c) Cold

33. Penicillin was discovered by

- a) Louis Pasteur
- b) Alexander Fleming
- c) Albert Einstein
- d) Robert Koch

Answer: b) Alexander Fleming

34. Penicillin was obtained from mould

- a) Rhizopus
- b) Aspergillus
- c) Penicillium notatum
- d) Yeast

Answer: c) Penicillium notatum

35. Antibiotics work by

- a) Increasing pain

- b) Strengthening muscles
- c) Killing or stopping bacteria growth
- d) Raising temperature

Answer: c) Killing or stopping bacteria growth

36.Excessive use of antibiotics leads to

- a) Faster cure
- b) Antibiotic resistance
- c) Better immunity
- d) No effect

Answer: b) Antibiotic resistance

37.Analgesics are medicines that reduce

- a) Fever
- b) Infection
- c) Pain
- d) Allergy

Answer: c) Pain

38.Pain is actually created in the

- a) Skin
- b) Muscles
- c) Brain
- d) Blood

Answer: c) Brain

39.Nociceptors are

- a) Blood cells
- b) Pain receptors
- c) Hormones

d) Enzymes

Answer: b) Pain receptors

40. Morphine belongs to

a) Non-narcotic analgesics

b) Antibiotics

c) Narcotic analgesics

d) Antipyretics

Answer: c) Narcotic analgesics

41. Paracetamol belongs to

a) Narcotic analgesics

b) Non-narcotic analgesics

c) Antibiotics

d) Antihistamines

Answer: b) Non-narcotic analgesics

42. Overdose of analgesics may cause

a) Faster healing

b) Liver damage

c) Fever

d) Allergy

Answer: b) Liver damage

43. Antihistamines are used to treat

a) Fever

b) Pain

c) Allergy

d) Infection

Answer: c) Allergy

44. Histamine is released during

- a) Infection
- b) Injury
- c) Allergic reaction
- d) Fever

Answer: c) Allergic reaction

45. Redness and rashes are due to

- a) Prostaglandin
- b) Histamine
- c) Antibiotics
- d) Antacids

Answer: b) Histamine

46. Which is an antihistamine?

- a) Diphenhydramine
- b) Paracetamol
- c) Penicillin
- d) Sodium bicarbonate

Answer: a) Diphenhydramine

47. Antiseptics are applied on

- a) Non-living surfaces
- b) Living tissues
- c) Metals
- d) Plastics

Answer: b) Living tissues

48. Antiseptics prevent

- a) Fire

- b) Rusting
- c) Microbial growth
- d) Evaporation

Answer: c) Microbial growth

49. Dettol is an example of

- a) Antibiotic
- b) Antiseptic
- c) Antipyretic
- d) Analgesic

Answer: b) Antiseptic

50. Which is a natural antiseptic?

- a) Petrol
- b) Turmeric
- c) Plastic
- d) Glass

Answer: b) Turmeric

51. Excess use of antiseptics may cause

- a) Skin irritation
- b) Fever
- c) Allergy relief
- d) Healing

Answer: a) Skin irritation

52. Disinfectants are mainly used on

- a) Skin
- b) Wounds
- c) Living tissues

d) Non-living surfaces

Answer: d) Non-living surfaces

53. Combustion is a

a) Physical reaction

b) Chemical reaction

c) Nuclear reaction

d) Biological reaction

Answer: b) Chemical reaction

54. Combustion requires

a) Fuel only

b) Oxygen only

c) Fuel and oxygen

d) Fuel, oxygen and heat

Answer: d) Fuel, oxygen and heat

55. Combustion reactions are

a) Endothermic

b) Exothermic

c) Neutral

d) Reversible

Answer: b) Exothermic

56. Oxidation reaction involves

a) Hydrogen

b) Nitrogen

c) Oxygen

d) Carbon

Answer: c) Oxygen

57. Combustion with flame occurs when substances

- a) Melt
- b) Vaporise
- c) Freeze
- d) Condense

Answer: b) Vaporise

58. Coal burns

- a) With flame
- b) Without flame
- c) With explosion
- d) With spark

Answer: b) Without flame

59. Rapid combustion needs

- a) No heat
- b) External heat
- c) No oxygen
- d) Water

Answer: b) External heat

60. LPG stove shows

- a) Slow combustion
- b) Rapid combustion
- c) Explosion
- d) Spontaneous combustion

Answer: b) Rapid combustion

61. Spontaneous combustion occurs

- a) With external heat

b) Without external heat

c) Only in labs

d) Only in water

Answer: b) Without external heat

62. Burning of hay is an example of

a) Rapid combustion

b) Explosion

c) Spontaneous combustion

d) Slow combustion

Answer: c) Spontaneous combustion

63. Explosion produces

a) Heat only

b) Light only

c) Heat, light and sound

d) Smoke only

Answer: c) Heat, light and sound

64. Respiration is an example of

a) Rapid combustion

b) Explosion

c) Slow combustion

d) Spontaneous combustion

Answer: c) Slow combustion

65. CO gas causes

a) Acid rain

b) Global warming

c) Respiratory problems

d) Ozone depletion

Answer: c) Respiratory problems

66.CO₂ mainly causes

a) Respiratory disease

b) Acid rain

c) Global warming

d) Skin allergy

Answer: c) Global warming

67.SO₂ and NO₂ cause

a) Global warming

b) Acid rain

c) Fire

d) Rusting

Answer: b) Acid rain

68.A flame is made of

a) Solid particles

b) Liquid particles

c) Hot glowing gases

d) Smoke only

Answer: c) Hot glowing gases

69.Outer zone of flame is

a) Yellow and luminous

b) Blue and hottest

c) Black and coolest

d) Red and cold

Answer: b) Blue and hottest

70. Incomplete combustion occurs in

- a) Outer zone
- b) Middle zone
- c) Inner zone
- d) Wick

Answer: b) Middle zone

71. Least hot part of flame is

- a) Outer zone
- b) Middle zone
- c) Inner zone
- d) Tip

Answer: c) Inner zone

72. Flame points upward because

- a) Gravity pulls it
- b) Cold air rises
- c) Hot gases rise
- d) Oxygen pushes it

Answer: c) Hot gases rise

73. Calorific value means

- a) Weight of fuel
- b) Heat produced per unit mass
- c) Volume of fuel
- d) Cost of fuel

Answer: b) Heat produced per unit mass

74. Unit of calorific value is

- a) Joule

b) kJ/kg

c) kg/J

d) m/s

Answer: b) kJ/kg

75. Ignition temperature is the

a) Highest temperature

b) Lowest temperature to catch fire

c) Room temperature

d) Melting point

Answer: b) Lowest temperature to catch fire

76. Inflammable substances have

a) High ignition temperature

b) Low ignition temperature

c) No ignition temperature

d) Variable ignition temperature

Answer: b) Low ignition temperature

77. Petrol is

a) Non-flammable

b) Inflammable

c) Fire extinguisher

d) Disinfectant

Answer: b) Inflammable

78. A good fuel should have

a) Low calorific value

b) High pollution

c) High calorific value

d) High cost

Answer: c) High calorific value

79. A good fuel should be

a) Difficult to store

b) Highly polluting

c) Easily available

d) Very expensive

Answer: c) Easily available

80. Fire is produced by

a) Matter only

b) Energy only

c) Both matter and energy

d) Vacuum

Answer: c) Both matter and energy

81. Fire can be controlled by removing

a) Fuel

b) Oxygen

c) Heat

d) Any one of these

Answer: d) Any one of these

82. Fire extinguisher works by

a) Adding fuel

b) Increasing oxygen

c) Cooling or cutting oxygen

d) Increasing heat

Answer: c) Cooling or cutting oxygen

83. Fire extinguisher releases

- a) Fuel
- b) Water only
- c) Extinguishing agent
- d) Oxygen

Answer: c) Extinguishing agent

84. CO₂ fire extinguisher works by

- a) Cooling fire
- b) Removing oxygen
- c) Adding heat
- d) Adding fuel

Answer: b) Removing oxygen

85. Water extinguisher is suitable for

- a) Electrical fire
- b) Oil fire
- c) Wood and paper fire
- d) Gas fire

Answer: c) Wood and paper fire

86. Dry chemical powder extinguisher is used for

- a) Only solid fires
- b) Only liquid fires
- c) Multiple types of fires
- d) Water fires

Answer: c) Multiple types of fires

87. Fire Class A includes

- a) Electrical fires

- b) Metal fires
- c) Solid material fires
- d) Gas fires

Answer: c) Solid material fires

88. Fire Class B involves

- a) Wood
- b) Paper
- c) Flammable liquids
- d) Metals

Answer: c) Flammable liquids

89. Fire Class C relates to

- a) Solid fires
- b) Liquid fires
- c) Gas fires
- d) Metal fires

Answer: c) Gas fires

90. Fire Class D involves

- a) Electrical appliances
- b) Cooking oils
- c) Metals
- d) Paper

Answer: c) Metals

91. Fire Class E is related to

- a) Wood
- b) Oil
- c) Electrical fires

d) Metals

Answer: c) Electrical fires

92. Combustion always produces

a) Smoke

b) Ash

c) Energy

d) Water

Answer: c) Energy

93. Flame colour indicates

a) Fuel type only

b) Temperature of zones

c) Size of candle

d) Length of wick

Answer: b) Temperature of zones

94. Yellow flame indicates

a) Complete combustion

b) Incomplete combustion

c) No combustion

d) Explosion

Answer: b) Incomplete combustion

95. Blue flame indicates

a) Incomplete combustion

b) No combustion

c) Perfect combustion

d) Explosion

Answer: c) Perfect combustion

96. Combustion without flame occurs when fuel

- a) Vaporises
- b) Does not vaporise
- c) Is liquid
- d) Is gas

Answer: b) Does not vaporise

97. Fire triangle consists of

- a) Fuel, water, oxygen
- b) Fuel, heat, oxygen
- c) Heat, water, oxygen
- d) Fuel, air, smoke

Answer: b) Fuel, heat, oxygen

98. Removing oxygen stops fire by

- a) Cooling fuel
- b) Increasing pressure
- c) Smothering
- d) Ignition

Answer: c) Smothering

99. Hair spray works similar to

- a) Fire extinguisher
- b) Fuel pump
- c) Inhaler
- d) Spray bottle only

Answer: a) Fire extinguisher

100. Chemistry in everyday life helps us

- a) Memorize reactions

b) Avoid medicines

c) Use substances safely and wisely

d) Stop chemical reactions

Answer: c) Use substances safely and wisely
