

Electricity

MCQ

1. Electricity is mainly used to

- a) Grow plants
- b) Light homes and run appliances
- c) Change seasons
- d) Make water pure

Answer: b

2. Before the discovery of electricity, people mainly used

- a) Bulbs
- b) Electric heaters
- c) Candles and firewood
- d) Solar panels

Answer: c

3. Which of the following is NOT a source of electricity?

- a) Wind power
- b) Solar power
- c) Thermal power
- d) Plastic

Answer: d

4. Electricity produced using heat energy is generated in a

- a) Hydel power station
- b) Windmill
- c) Thermal power station
- d) Solar panel

Answer: c

5. In a thermal power station, fuel is mainly used to

- a) Produce electricity directly
- b) Make water cold

- c) Produce heat
- d) Store energy

Answer: c

6. In thermal power stations, steam is used to spin the

- a) Cell
- b) Wire
- c) Turbine
- d) Switch

Answer: c

7. In hydel power stations, electricity is produced using

- a) Heat
- b) Wind
- c) Flowing water
- d) Coal

Answer: c

8. The word “hydro” in hydroelectric power means

- a) Heat
- b) Water
- c) Wind
- d) Sun

Answer: b

9. In atomic power stations, which energy is first used?

- a) Electrical energy
- b) Mechanical energy
- c) Nuclear energy
- d) Chemical energy

Answer: c

10. In nuclear power stations, nuclear energy is finally converted into

- a) Heat only
- b) Sound energy

- c) Electrical energy
- d) Light energy

Answer: c

11. A windmill works by converting _____ energy into electrical energy.

- a) Heat
- b) Chemical
- c) Kinetic
- d) Nuclear

Answer: c

12. The big blades of a windmill rotate due to

- a) Heat
- b) Water
- c) Wind
- d) Electricity

Answer: c

13. A device that converts chemical energy into electrical energy is called a

- a) Bulb
- b) Switch
- c) Cell
- d) Wire

Answer: c

14. The chemical solution used in a cell is called

- a) Electrode
- b) Electrolyte
- c) Insulator
- d) Conductor

Answer: b

15. A cell has how many electrodes?

- a) One
- b) Two

- c) Three
- d) Four

Answer: b

16. Cells that cannot be recharged are called

- a) Secondary cells
- b) Solar cells
- c) Primary cells
- d) Fuel cells

Answer: c

17. Primary cells are commonly used in

- a) Cars
- b) Mobile phones
- c) Toys and clocks
- d) Power stations

Answer: c

18. A cell that can be recharged and reused is called a

- a) Primary cell
- b) Dry cell
- c) Secondary cell
- d) Simple cell

Answer: c

19. Which of the following uses secondary cells?

- a) Wall clock
- b) Torch
- c) Mobile phone
- d) Calculator

Answer: c

20. A battery is formed by

- a) One cell
- b) One bulb

- c) Two or more cells
- d) A switch

Answer: c

21. An electric circuit is a

- a) Broken path
- b) Closed path
- c) Curved wire
- d) Long wire

Answer: b

22. Electric current flows from the _____ terminal to the _____ terminal.

- a) Negative to positive
- b) Positive to negative
- c) Earth to battery
- d) Switch to bulb

Answer: b

23. Which of the following is NOT a part of a simple circuit?

- a) Cell
- b) Bulb
- c) Switch
- d) Fan

Answer: d

24. A circuit in which the key is OFF is called

- a) Closed circuit
- b) Simple circuit
- c) Open circuit
- d) Parallel circuit

Answer: c

25. In an open circuit, the bulb

- a) Glows brightly
- b) Glows dimly

- c) Does not glow
- d) Flickers

Answer: c

26. A closed circuit allows current to

- a) Stop
- b) Flow
- c) Reduce
- d) Break

Answer: b

27. A circuit with simple elements like cell, bulb and switch is called

- a) Series circuit
- b) Parallel circuit
- c) Simple circuit
- d) Complex circuit

Answer: c

28. In a series circuit, the current is

- a) Different in each bulb
- b) Same in all bulbs
- c) Zero
- d) Random

Answer: b

29. If one bulb in a series circuit is damaged, then

- a) Others glow brighter
- b) Only one stops glowing
- c) Entire circuit stops working
- d) Circuit becomes parallel

Answer: c

30. In a parallel circuit, current has

- a) Only one path
- b) No path

- c) Two or more paths
- d) A broken path

Answer: c

31. In a parallel circuit, if one bulb fails

- a) All bulbs go off
- b) Other bulbs glow normally
- c) Circuit stops completely
- d) Battery gets damaged

Answer: b

32. Which circuit is commonly used in homes?

- a) Series circuit
- b) Simple circuit
- c) Parallel circuit
- d) Open circuit

Answer: c

33. Materials that allow electric current to pass through them are called

- a) Insulators
- b) Conductors
- c) Electrolytes
- d) Plastics

Answer: b

34. Which of the following is a conductor?

- a) Rubber
- b) Plastic
- c) Glass
- d) Copper

Answer: d

35. Graphite is a

- a) Metal insulator
- b) Non-metal conductor

- c) Poor conductor
- d) Liquid conductor

Answer: b

36. The human body is a

- a) Perfect insulator
- b) Poor conductor
- c) Good conductor
- d) Non-conductor

Answer: c

37. Which material does NOT allow current to pass?

- a) Safety pin
- b) Copper wire
- c) Rubber band
- d) Coin

Answer: c

38. Insulators are mainly used to

- a) Increase current
- b) Store electricity
- c) Prevent electric shock
- d) Produce electricity

Answer: c

39. Electric wires are covered with plastic because plastic is a

- a) Conductor
- b) Metal
- c) Insulator
- d) Generator

Answer: c

40. Which is an insulator?

- a) Needle
- b) Coin

- c) Tap water
- d) Wood

Answer: d

41. Electrical plugs are mainly made of

- a) Wood
- b) Rubber
- c) Conductors
- d) Glass

Answer: c

42. Electricians wear rubber gloves to

- a) Look neat
- b) Increase grip
- c) Avoid electric shock
- d) Repair faster

Answer: c

43. Screwdrivers used by electricians are made of

- a) Iron
- b) Copper
- c) Hard plastic or wood
- d) Aluminium

Answer: c

44. Electric shock can be dangerous because

- a) Electricity flows slowly
- b) Human body conducts electricity
- c) Wires melt
- d) Bulbs glow

Answer: b

45. First step to help a person getting electric shock is to

- a) Touch the person
- b) Pour water

- c) Switch off power supply
- d) Run away

Answer: c

46. A person should be pushed away using

- a) Iron rod
- b) Wet cloth
- c) Wooden stick
- d) Copper wire

Answer: c

47. After an electric shock, the injured person should be

- a) Left alone
- b) Given first aid
- c) Scolded
- d) Ignored

Answer: b

48. Which energy conversion happens in a cell?

- a) Heat to electrical
- b) Chemical to electrical
- c) Mechanical to electrical
- d) Nuclear to electrical

Answer: b

49. Pure water is an

- a) Good conductor
- b) Insulator
- c) Metal
- d) Electrolyte

Answer: b

50. Electricity has made human life

- a) Slower
- b) Harder

c) Easier and faster

d) More dangerous

Answer: c
