

Matter around us (8th std)

1. What is matter?

- A) Anything that shines
- B) Anything that occupies space and has mass
- C) Only solids
- D) Only liquids

Answer: B

2. Matter is made up of:

- A) Cells
- B) Molecules only
- C) Tiny particles
- D) Energy

Answer: C

3. Which is NOT a property of particles of matter?

- A) They have space between them
- B) They attract each other
- C) They are invisible always
- D) They are very small

Answer: C

4. Matter is mainly divided into:

- A) Two groups
- B) Three groups
- C) Four groups
- D) Five groups

Answer: A

5. Living things can:

- A) Stay still always

- B) Not grow
- C) Reproduce and grow
- D) Not move

Answer: C

6. Which is a living thing?

- A) Water
- B) Oxygen
- C) Plant
- D) Toy

Answer: C

7. Which is a non-living thing?

- A) Animal
- B) Human
- C) Water
- D) Plant

Answer: C

8. States of matter are:

- A) Two
- B) Three
- C) Four
- D) Five

Answer: B

9. Which is a solid?

- A) Milk
- B) Steam
- C) Table

D) Air

Answer: C

10. Which is a liquid?

A) Juice

B) Fog

C) Wind

D) Stone

Answer: A

11. Which is a gas?

A) Apple

B) Steam

C) Pencil

D) Book

Answer: B

12. The smallest particle of an element is:

A) Molecule

B) Atom

C) Ion

D) Cell

Answer: B

13. Atoms combine to form:

A) Cells

B) Molecules

C) Solids

D) Energy

Answer: B

14.Charged atoms are called:

- A) Molecules
- B) Ions
- C) Compounds
- D) Elements

Answer: B

15.An element is:

- A) A mixture
- B) A compound
- C) Pure substance
- D) Gas

Answer: C

16.Elements cannot be broken by:

- A) Physical methods
- B) Chemical processes
- C) Heating
- D) Cooling

Answer: B

17.Elements consist of:

- A) Many atoms
- B) One type of atom
- C) Two types of atoms
- D) Molecules

Answer: B

18.Total number of elements is:

- A) 100
- B) 118

C) 150

D) 200

Answer: B

19. Element symbols are:

A) Numbers

B) Codes

C) One or two letters

D) Shapes

Answer: C

20. First letter of symbol is always:

A) Small

B) Capital

C) Number

D) Symbol

Answer: B

21. Greek symbols represented:

A) Metals

B) Four basic elements

C) Compounds

D) Molecules

Answer: B

22. Alchemy aimed to:

A) Make water

B) Change metals into gold

C) Create air

D) Study gases

Answer: B

23. Dalton used:

- A) Letters
- B) Numbers
- C) Pictorial symbols
- D) Codes

Answer: C

24. Berzelius introduced:

- A) Numbers
- B) Letters
- C) Pictures
- D) Shapes

Answer: B

25. Metals are generally:

- A) Soft
- B) Gases
- C) Hard
- D) Liquids

Answer: C

26. Metals are:

- A) Dull
- B) Shiny
- C) Transparent
- D) Invisible

Answer: B

27. Property of hammering metals is:

- A) Ductility
- B) Malleability

- C) Density
- D) Conductivity

Answer: B

28. Drawing metals into wires is:

- A) Density
- B) Ductility
- C) Malleability
- D) Hardness

Answer: B

29. Metals are good conductors of:

- A) Light
- B) Heat and electricity
- C) Sound only
- D) Water

Answer: B

30. Metals produce sound when hit, called:

- A) Hard
- B) Sonorous
- C) Shiny
- D) Ductile

Answer: B

31. Iron is used for:

- A) Jewelry
- B) Bridges
- C) Fuel
- D) Medicines

Answer: B

32. Copper is used for:

- A) Fuel
- B) Plastic
- C) Wires
- D) Food

Answer: C

33. Mercury is used in:

- A) Furniture
- B) Thermometers
- C) Toys
- D) Clothes

Answer: B

34. Non-metals are:

- A) Good conductors
- B) Insulators
- C) Metals
- D) Liquids only

Answer: B

35. Non-metals are mostly:

- A) Solids
- B) Liquids
- C) Gases
- D) Plasma

Answer: C

36. Which is a non-metal gas?

- A) Iron
- B) Oxygen

C) Copper

D) Gold

Answer: B

37. Only liquid non-metal is:

A) Oxygen

B) Bromine

C) Nitrogen

D) Carbon

Answer: B

38. Solid non-metal example:

A) Hydrogen

B) Sulphur

C) Helium

D) Neon

Answer: B

39. Non-metals are:

A) Hard

B) Dull

C) Shiny

D) Strong

Answer: B

40. Non-metals are:

A) Malleable

B) Ductile

C) Non-malleable

D) Conductive

Answer: C

41. Graphite conducts:

- A) Heat
- B) Electricity
- C) Sound
- D) Light

Answer: B

42. Diamond is:

- A) Soft
- B) Hardest
- C) Liquid
- D) Gas

Answer: B

43. Non-metals are:

- A) Sonorous
- B) Non-sonorous
- C) Conductive
- D) Magnetic

Answer: B

44. Diamond is used for:

- A) Cooking
- B) Jewelry
- C) Fuel
- D) Writing

Answer: B

45. Nitrogen is used to make:

- A) Oxygen
- B) Ammonia

C) Water

D) Iron

Answer: B

46. Chlorine is used for:

A) Cooking

B) Bleaching

C) Painting

D) Building

Answer: B

47. Hydrogen is used as:

A) Food

B) Fuel

C) Plastic

D) Metal

Answer: B

48. Metalloids show properties of:

A) Only metals

B) Only non-metals

C) Both

D) Neither

Answer: C

49. Metalloids are:

A) Liquids

B) Gases

C) Solids

D) Plasma

Answer: C

50.Silicon is a:

- A) Metal
- B) Non-metal
- C) Metalloid
- D) Gas

Answer: C

51.Metalloids are:

- A) Good conductors
- B) Insulators
- C) Semiconductors
- D) Liquids

Answer: C

52.Silicon is used in:

- A) Cooking
- B) Electronics
- C) Farming
- D) Medicine

Answer: B

53.Boron is used in:

- A) Food
- B) Fireworks
- C) Water
- D) Air

Answer: B

54.A compound is made of:

- A) One element
- B) Two or more elements

C) Only metals

D) Only gases

Answer: B

55. Compounds have:

A) Variable composition

B) Fixed ratio

C) No ratio

D) Random ratio

Answer: B

56. Example of compound:

A) Oxygen

B) Hydrogen

C) Water

D) Iron

Answer: C

57. Water formula is:

A) H_2O

B) CO_2

C) O_2

D) H_2

Answer: A

58. In water, hydrogen and oxygen ratio is:

A) 2:1

B) 1:2

C) 1:8

D) 8:1

Answer: C

59. Compounds are:

- A) Heterogeneous
- B) Homogeneous
- C) Mixed
- D) Random

Answer: B

60. Inorganic compounds come from:

- A) Living things
- B) Non-living sources
- C) Animals
- D) Plants

Answer: B

61. Example of inorganic compound:

- A) Protein
- B) DNA
- C) CO₂
- D) Soap

Answer: C

62. Organic compounds come from:

- A) Rocks
- B) Minerals
- C) Living sources
- D) Air

Answer: C

63. Organic compounds contain:

- A) Only oxygen
- B) Carbon

C) Only nitrogen

D) Metals

Answer: B

64. Example of organic compound:

A) Chalk

B) Water

C) Protein

D) CO₂

Answer: C

65. Carbon compounds without C-H bonds are:

A) Organic

B) Inorganic

C) Metals

D) Elements

Answer: B

66. Compounds can exist as:

A) Only solids

B) Only liquids

C) Only gases

D) All three states

Answer: D

67. Molecules are formed by:

A) Ions

B) Atoms

C) Cells

D) Energy

Answer: B

68. Ions carry:

- A) Mass
- B) Charge
- C) Energy
- D) Volume

Answer: B

69. Elements are:

- A) Mixtures
- B) Pure substances
- C) Compounds
- D) Gases

Answer: B

70. Metals are usually:

- A) Low density
- B) High density
- C) No density
- D) Liquid

Answer: B

71. Non-metals have:

- A) High melting point
- B) Low melting point
- C) No melting point
- D) Fixed melting point

Answer: B

72. Metals reflect:

- A) Sound
- B) Heat

C) Light

D) Air

Answer: C

73. Non-metals are:

A) Hard

B) Soft

C) Strong

D) Dense

Answer: B

74. Metalloids are also called:

A) Metals

B) Non-metals

C) Semimetals

D) Compounds

Answer: C

75. Elements named after scientists are:

A) Common

B) Rare

C) Named specially

D) Random

Answer: C

76. Symbols based on Latin names are used for:

A) All elements

B) Some elements

C) No elements

D) Only metals

Answer: B

77. Second letter in symbol is:

- A) Capital
- B) Small
- C) Number
- D) Symbol

Answer: B

78. Metals are:

- A) Poor conductors
- B) Good conductors
- C) Insulators
- D) Liquids

Answer: B

79. Non-metals lack:

- A) All metallic properties
- B) Only hardness
- C) Only shine
- D) Only density

Answer: A

80. Matter includes:

- A) Only solids
- B) Only liquids
- C) Only gases
- D) Solids, liquids, gases

Answer: D
