

Our Environment

MCQs

1. Living and non-living components together form an
 - a) Population
 - b) Community
 - c) Ecosystem
 - d) Habitat

Answer: c) Ecosystem

2. Living components of the environment are called
 - a) Abiotic
 - b) Biotic
 - c) Physical
 - d) Chemical

Answer: b) Biotic

3. Non-living components of the environment are called
 - a) Biotic
 - b) Organic
 - c) Abiotic
 - d) Natural

Answer: c) Abiotic

4. The balance in the environment is maintained by
 - a) Plants only
 - b) Animals only
 - c) Interaction between biotic and abiotic components
 - d) Climate only

Answer: c) Interaction between biotic and abiotic components

5. The study of relationships between organisms and environment is called
 - a) Zoology
 - b) Botany
 - c) Ecology

d) Biology

Answer: c) Ecology

6. The Greek word "Oikos" means

a) Nature

b) Earth

c) Home

d) Life

Answer: c) Home

7. An ecosystem includes

a) Only plants

b) Only animals

c) Living and non-living components

d) Only microorganisms

Answer: c) Living and non-living components

8. Which is an example of a natural ecosystem?

a) Garden

b) Aquarium

c) Forest

d) Crop field

Answer: c) Forest

9. Ponds, rivers and lakes are examples of

a) Terrestrial ecosystem

b) Artificial ecosystem

c) Aquatic ecosystem

d) Desert ecosystem

Answer: c) Aquatic ecosystem

10. Forests and deserts are examples of

a) Aquatic ecosystems

b) Terrestrial ecosystems

c) Artificial ecosystems

d) Marine ecosystems

Answer: b) Terrestrial ecosystems

11. An ecosystem created by humans is called

- a) Natural ecosystem
- b) Forest ecosystem
- c) Artificial ecosystem
- d) Aquatic ecosystem

Answer: c) Artificial ecosystem

12. Which is an artificial aquatic ecosystem?

- a) Pond
- b) Lake
- c) River
- d) Aquarium

Answer: d) Aquarium

13. Paddy fields are an example of

- a) Natural terrestrial ecosystem
- b) Artificial terrestrial ecosystem
- c) Natural aquatic ecosystem
- d) Marine ecosystem

Answer: b) Artificial terrestrial ecosystem

14. Terrariums are used to maintain

- a) Aquatic plants
- b) Terrestrial organisms
- c) Only fish
- d) Only insects

Answer: b) Terrestrial organisms

15. Artificial ecosystems are usually

- a) More complex
- b) Simpler than natural ecosystems
- c) Larger
- d) Unstable always

Answer: b) Simpler than natural ecosystems

16. Organisms that make their own food are called

- a) Consumers

- b) Decomposers
- c) Producers
- d) Predators

Answer: c) Producers

17. Producers are also known as

- a) Heterotrophs
- b) Saprotrophs
- c) Autotrophs
- d) Parasites

Answer: c) Autotrophs

18. Photosynthesis needs

- a) Oxygen and glucose
- b) Sunlight, water and carbon dioxide
- c) Soil and minerals only
- d) Heat and air

Answer: b) Sunlight, water and carbon dioxide

19. Oxygen is released during

- a) Respiration
- b) Digestion
- c) Photosynthesis
- d) Decomposition

Answer: c) Photosynthesis

20. Animals that cannot make food are called

- a) Producers
- b) Autotrophs
- c) Consumers
- d) Plants

Answer: c) Consumers

21. Animals that eat only plants are called

- a) Carnivores
- b) Omnivores
- c) Herbivores

d) Decomposers

Answer: c) Herbivores

22. Which is a herbivore?

a) Lion

b) Deer

c) Snake

d) Frog

Answer: b) Deer

23. Animals that eat other animals are called

a) Herbivores

b) Omnivores

c) Carnivores

d) Producers

Answer: c) Carnivores

24. Which is a carnivore?

a) Goat

b) Cow

c) Tiger

d) Elephant

Answer: c) Tiger

25. Animals that eat both plants and animals are called

a) Herbivores

b) Carnivores

c) Omnivores

d) Decomposers

Answer: c) Omnivores

26. Humans are

a) Herbivores

b) Carnivores

c) Omnivores

d) Producers

Answer: c) Omnivores

27. Bacteria and fungi are examples of

- a) Producers
- b) Consumers
- c) Decomposers
- d) Herbivores

Answer: c) Decomposers

28. Decomposers feed on

- a) Living plants
- b) Living animals
- c) Dead and decaying matter
- d) Sunlight

Answer: c) Dead and decaying matter

29. Decomposers are also called

- a) Autotrophs
- b) Saprotrophs
- c) Carnivores
- d) Herbivores

Answer: b) Saprotrophs

30. Humus is formed due to

- a) Photosynthesis
- b) Respiration
- c) Decomposition
- d) Evaporation

Answer: c) Decomposition

31. A food chain shows

- a) Energy loss
- b) Feeding relationship
- c) Pollution level
- d) Population size

Answer: b) Feeding relationship

32. Grass → Deer → Tiger is a

- a) Food web

- b) Food chain
- c) Ecosystem
- d) Pyramid

Answer: b) Food chain

33. The ultimate source of energy is

- a) Soil
- b) Water
- c) Sun
- d) Plants

Answer: c) Sun

34. Energy flows from

- a) Consumers to producers
- b) Producers to consumers
- c) Animals to plants
- d) Decomposers to plants

Answer: b) Producers to consumers

35. Plants store energy from

- a) Soil
- b) Water
- c) Sunlight
- d) Minerals

Answer: c) Sunlight

36. Animals that eat plants are called

- a) Secondary consumers
- b) Tertiary consumers
- c) Primary consumers
- d) Decomposers

Answer: c) Primary consumers

37. Animals that eat primary consumers are

- a) Producers
- b) Secondary consumers
- c) Decomposers

d) Herbivores

Answer: b) Secondary consumers

38. Each step in a food chain is called

a) Habitat

b) Population

c) Trophic level

d) Community

Answer: c) Trophic level

39. Only about ____ energy is passed to the next trophic level

a) 50%

b) 25%

c) 10%

d) 90%

Answer: c) 10%

40. Energy loss at each level is shown by

a) Food chain

b) Food web

c) Ecological pyramid

d) Ecosystem

Answer: c) Ecological pyramid

41. Interconnected food chains form a

a) Food chain

b) Food web

c) Pyramid

d) Ecosystem

Answer: b) Food web

42. Food web shows

a) Only one feeding relation

b) Multiple feeding relations

c) Energy loss only

d) Producers only

Answer: b) Multiple feeding relations

43. Waste is material that is

- a) Useful
- b) Wanted
- c) Not needed
- d) New

Answer: c) Not needed

44. Which is biodegradable waste?

- a) Plastic
- b) Glass
- c) Vegetable peels
- d) Metal

Answer: c) Vegetable peels

45. Biodegradable wastes are broken down by

- a) Heat
- b) Wind
- c) Microorganisms
- d) Rocks

Answer: c) Microorganisms

46. Paper is a

- a) Non-biodegradable waste
- b) Biodegradable waste
- c) Toxic waste
- d) Liquid waste

Answer: b) Biodegradable waste

47. Plastic bags are

- a) Biodegradable
- b) Organic waste
- c) non-biodegradable
- d) Compostable

Answer: c) non-biodegradable

48. Which waste takes thousands of years to decompose?

- a) Leaves

- b) Food waste
- c) Plastic
- d) Paper

Answer: c) Plastic

49. The 3 R's stand for

- a) Reduce, Recycle, Reuse
- b) Reuse, Reduce, recycle
- c) Reduce, Reuse, recycle
- d) Remove, Reduce, recycle

Answer: c) Reduce, Reuse, Recycle

50. Using cloth bags instead of plastic bags is an example of

- a) Recycling
- b) Reducing
- c) Reusing
- d) Burning

Answer: b) Reducing

51. Making new products from waste is called

- a) Reducing
- b) Reusing
- c) Recycling
- d) Composting

Answer: c) Recycling

52. Composting converts waste into

- a) Plastic
- b) Fertilizer
- c) Fuel
- d) Ash

Answer: b) Fertilizer

53. Vermicomposting uses

- a) Bacteria
- b) Fungus
- c) Earthworms

d) Insects

Answer: c) Earthworms

54. Red worms help in

a) Pollution

b) Decomposition

c) Photosynthesis

d) Respiration

Answer: b) Decomposition

55. Burning waste in an incinerator is called

a) Composting

b) Recycling

c) Incineration

d) Landfilling

Answer: c) Incineration

56. Landfills are

a) Water bodies

b) Waste dumping areas

c) Forests

d) Factories

Answer: b) Waste dumping areas

57. Pollution is caused by

a) Clean air

b) Natural balance

c) Pollutants

d) Plants

Answer: c) Pollutants

58. Which is NOT a type of pollution?

a) Air

b) Water

c) Noise

d) Energy

Answer: d) Energy

59. Burning fossil fuels causes

- a) Water pollution
- b) Land pollution
- c) Air pollution
- d) Noise pollution

Answer: c) Air pollution

60. Acid rain is caused due to

- a) Clean air
- b) Toxic gases mixing with rain
- c) Pure water
- d) Plants

Answer: b) Toxic gases mixing with rain

61. Using public transport helps reduce

- a) Water pollution
- b) Noise pollution
- c) Air pollution
- d) Soil pollution

Answer: c) Air pollution

62. Sewage mainly causes

- a) Air pollution
- b) Water pollution
- c) Noise pollution
- d) Land pollution

Answer: b) Water pollution

63. Excess use of fertilizers affects

- a) Air
- b) Water and soil
- c) Noise
- d) Sunlight

Answer: b) Water and soil

64. Soil acts like a

- a) Filter

b) Sponge

c) Mirror

d) Barrier

Answer: b) Sponge

65. Loud music causes

a) Air pollution

b) Water pollution

c) Noise pollution

d) Soil pollution

Answer: c) Noise pollution

66. Noise pollution affects

a) Hearing

b) Vision

c) Taste

d) Smell

Answer: a) Hearing

67. Fireworks mainly cause

a) Water pollution

b) Noise pollution

c) Soil pollution

d) No pollution

Answer: b) Noise pollution

68. Whales are affected by noise pollution because

a) They lose food

b) They lose direction

c) They lose colour

d) They stop swimming

Answer: b) They lose direction

69. Turning off unused electronics helps reduce

a) Pollution

b) Population

c) Ecosystem

d) Food chain

Answer: a) Pollution

70. Speaking softly helps reduce

a) Air pollution

b) Water pollution

c) Noise pollution

d) Land pollution

Answer: c) Noise pollution

71. Plants depend on abiotic components like

a) Animals

b) Microorganisms

c) Sunlight and water

d) Decomposers

Answer: c) Sunlight and water

72. A garden is an example of

a) Natural ecosystem

b) Artificial ecosystem

c) Marine ecosystem

d) Desert ecosystem

Answer: b) Artificial ecosystem

73. Which is a liquid waste?

a) Plastic

b) Smoke

c) Sewage

d) Glass

Answer: c) Sewage

74. Which is a gaseous pollutant?

a) Plastic

b) Smoke

c) Paper

d) Soil

Answer: b) Smoke

75. Best way to manage waste is to

- a) Burn it
- b) Dump it
- c) Reduce it
- d) Ignore it

Answer: c) Reduce it

76. Using both sides of paper is an example of

- a) Recycling
- b) Reducing
- c) Reusing
- d) Composting

Answer: c) Reusing

77. Which waste is organic?

- a) Glass
- b) Plastic
- c) Vegetable waste
- d) Metal

Answer: c) Vegetable waste

78. Soil pollution can enter our body through

- a) Water
- b) Food
- c) Air
- d) Noise

Answer: b) Food

79. Ecosystem balance is disturbed mainly due to

- a) Natural interaction
- b) Pollution
- c) Photosynthesis
- d) Decomposition

Answer: b) Pollution

80. Protecting the environment is the responsibility of

- a) Government only

b) Scientists only

c) Humans only

d) Everyone

Answer: d) Everyone
