

Plants in Daily Life

MCQs

1. Earth is called a green planet because it has

- a) Many oceans
- b) Many deserts
- c) Abundant plants
- d) High mountains

Answer: c) Abundant plants

2. The branch of science that studies useful plants is called

- a) Ecology
- b) Botany
- c) Economic botany
- d) Zoology

Answer: c) Economic botany

3. Economic botany mainly focuses on plants useful for

- a) Decoration only
- b) Human welfare
- c) Animal behaviour
- d) Weather studies

Answer: b) Human welfare

4. Which of the following is a direct use of plants?

- a) Livestock feeding
- b) Soil maintenance
- c) Food consumption
- d) Environmental balance

Answer: c) Food consumption

5. Which factor mostly determines a country's wealth?

- a) Minerals
- b) Oceans
- c) Agriculture and plant products
- d) Tourism

Answer: c) Agriculture and plant products

6. Charred grains found in excavations show

- a) Forest fires
- b) Ancient crop usage
- c) Animal food
- d) Climate change

Answer: b) Ancient crop usage

7. Plants provide oxygen through

- a) Respiration
- b) Germination
- c) Photosynthesis
- d) Transpiration

Answer: c) Photosynthesis

8. Which gas released by plants is essential for life?

- a) Carbon dioxide
- b) Nitrogen
- c) Oxygen
- d) Hydrogen

Answer: c) Oxygen

9. Paddy, wheat, and millets are examples of

- a) Pulses
- b) Spices
- c) Staple foods
- d) Fibres

Answer: c) Staple foods

10. Which of the following is NOT a classification of plants based on use?

- a) Food plants
- b) Fibre plants
- c) Aquatic plants
- d) Medicinal plants

Answer: c) Aquatic plants

11. Which part of carrot is eaten?

- a) Stem
- b) Leaf
- c) Root
- d) Flower

Answer: c) Root

12. Beetroot stores food mainly in its

- a) Leaf
- b) Root
- c) Stem
- d) Seed

Answer: b) Root

13. Spinach is a vegetable obtained from

- a) Roots
- b) Stems
- c) Leaves
- d) Flowers

Answer: c) Leaves

14. Potato is an example of a

- a) Root vegetable
- b) Leaf vegetable
- c) Stem vegetable
- d) Flower vegetable

Answer: c) Stem vegetable

15. Which of the following is a flower vegetable?

- a) Onion
- b) Banana flower
- c) Tomato
- d) Potato

Answer: b) Banana flower

16. Which of the following is a fruit?

- a) Cabbage
- b) Carrot
- c) Apple
- d) Spinach

Answer: c) Apple

17. Cereals belong to which type of plants?

- a) Shrubs
- b) Trees
- c) Grasses
- d) Climbers

Answer: c) Grasses

18. The edible part of cereals is

- a) Root
- b) Leaf
- c) Grain
- d) Stem

Answer: c) Grain

19. Which part is NOT found in cereal grains?

- a) Germ
- b) Endosperm
- c) Bran
- d) Cortex

Answer: d) Cortex

20. Rice and wheat are examples of

- a) Pulses
- b) Cereals
- c) Spices
- d) Fibres

Answer: b) Cereals

21. Pulses belong to which plant family?

- a) Grass family
- b) Legume family
- c) Palm family
- d) Cactus family

Answer: b) Legume family

22. Pulses grow inside

- a) Fruits
- b) Roots
- c) Pods
- d) Flowers

Answer: c) Pods

23. Which of the following is a pulse?

- a) Maize
- b) Chickpea
- c) Wheat
- d) Barley

Answer: b) Chickpea

24. Spices are mainly used to

- a) Increase yield
- b) Add flavour
- c) Improve soil
- d) Produce oxygen

Answer: b) Add flavour

25. Which part of cinnamon is used as a spice?

- a) Leaf
- b) Seed
- c) Bark
- d) Root

Answer: c) Bark

26. Turmeric is obtained from

- a) Root
- b) Rhizome
- c) Seed

d) Leaf

Answer: b) Rhizome

27. Which chemical gives medicinal value to plants?

a) Minerals

b) Proteins

c) Phytochemicals

d) Vitamins

Answer: c) Phytochemicals

28. Tulsi is mainly used for

a) Skin diseases

b) Fever and cold

c) Bone strength

d) Eye problems

Answer: b) Fever and cold

29. Neem has strong

a) Sweet taste

b) Antibacterial properties

c) Nutrient value

d) Fibre content

Answer: b) Antibacterial properties

30. Ginger helps mainly in

a) Vision

b) Digestion

c) Blood clotting

d) Bone growth

Answer: b) Digestion

31. Plants providing fibres are called

a) Timber plants

b) Food plants

c) Fibre yielding plants

d) Ornamental plants

Answer: c) Fibre yielding plants

32. Cotton fibre is obtained from

a) Stem

b) Seed hairs

c) Leaf

d) Root

Answer: b) Seed hairs

33. Jute fibre is obtained from

- a) Leaves
- b) Roots
- c) Stem (bast)
- d) Seeds

Answer: c) Stem (bast)

34. Coconut fibre is obtained from

- a) Leaf
- b) Fruit husk
- c) Stem
- d) Root

Answer: b) Fruit husk

35. Fibres used for making ropes are called

- a) Textile fibres
- b) Filling fibres
- c) Cordage fibres
- d) Bast fibres

Answer: c) Cordage fibres

36. The process of making yarn from fibre is

- a) Weaving
- b) Knitting
- c) Spinning
- d) Stitching

Answer: c) Spinning

37. Silk cotton is used as

- a) Textile fibre
- b) Cordage fibre
- c) Filling fibre
- d) Leaf fibre

Answer: c) Filling fibre

38. Timber is obtained from

- a) Leaves
- b) Flowers
- c) Wood
- d) Seeds

Answer: c) Wood

39. Which feature is important for good timber?

- a) Soft texture
- b) High moisture

- c) Durability
- d) Green colour

Answer: c) Durability

40. Hardwood comes mainly from

- a) Gymnosperms
- b) Dicots
- c) Algae
- d) Fungi

Answer: b) Dicots

41. Teak wood is an example of

- a) Softwood
- b) Hardwood
- c) Composite wood
- d) Fibre wood

Answer: b) Hardwood

42. Pine wood is an example of

- a) Hardwood
- b) Softwood
- c) Composite wood
- d) Bast wood

Answer: b) Softwood

43. Softwoods are mostly obtained from

- a) Angiosperms
- b) Gymnosperms
- c) Herbs
- d) Shrubs

Answer: b) Gymnosperms

44. Plywood is an example of

- a) Hardwood
- b) Softwood
- c) Composite wood
- d) Fibre board

Answer: c) Composite wood

45. Ornamental plants are grown mainly for

- a) Food
- b) Medicine
- c) Decoration
- d) Fibre

Answer: c) Decoration

46. Floriculture deals with

- a) Crop production
- b) Medicinal plants
- c) Flower production
- d) Fibre plants

Answer: c) Flower production

47. Hibiscus is an example of a

- a) Tree
- b) Shrub
- c) Climber
- d) Herb

Answer: b) Shrub

48. Bougainvillea is a

- a) Shrub
- b) Tree
- c) Climber
- d) Herb

Answer: c) Climber

49. Plants prepare their own food because they are

- a) Heterotrophs
- b) Parasites
- c) Autotrophs
- d) Decomposers

Answer: c) Autotrophs

50. Animals depend on plants mainly for

- a) Shelter only
- b) Food only
- c) Food and shelter
- d) Oxygen only

Answer: c) Food and shelter

51. Silkworms feed on

- a) Cotton leaves
- b) Mulberry leaves
- c) Neem leaves
- d) Banana leaves

Answer: b) Mulberry leaves

52. Cross-pollination is helped by

- a) Rocks
- b) Insects and birds
- c) Roots

d) Soil

Answer: b) Insects and birds

53. Bright coloured flowers attract

a) Soil microbes

b) Wind

c) Pollinators

d) Roots

Answer: c) Pollinators

54. Honey bees help plants by

a) Eating leaves

b) Spreading seeds

c) Pollination

d) Breaking stems

Answer: c) Pollination

55. Ecology studies the relationship between

a) Plants only

b) Animals only

c) Plants, animals and environment

d) Humans and machines

Answer: c) Plants, animals and environment

56. Humus increases

a) Soil erosion

b) Soil fertility

c) Soil dryness

d) Soil salinity

Answer: b) Soil fertility

57. Cyanobacteria help in

a) Photosynthesis only

b) Nitrogen fixation

c) Pollination

d) Seed dispersal

Answer: b) Nitrogen fixation

58. Which bacterium helps in denitrification?

a) Rhizobium

b) Lactobacillus

c) Pseudomonas

d) E. coli

Answer: c) Pseudomonas

59. Plant roots prevent

- a) Rainfall
- b) Floods
- c) Soil erosion
- d) Photosynthesis

Answer: c) Soil erosion

60. Plants prevent soil erosion mainly by

- a) Leaves
- b) Flowers
- c) Roots
- d) Fruits

Answer: c) Roots

61. Bio-fuels are

- a) Highly toxic
- b) Environment friendly
- c) Non-renewable
- d) Expensive

Answer: b) Environment friendly

62. Jatropha oil is used as

- a) Cooking oil
- b) Bio-diesel
- c) Medicine
- d) Fertiliser

Answer: b) Bio-diesel

63. Rubber is obtained from

- a) Roots
- b) Seeds
- c) Latex
- d) Bark

Answer: c) Latex

64. Natural plastics are

- a) Non-degradable
- b) Harmful
- c) Biodegradable
- d) Toxic

Answer: c) Biodegradable

65. Neem-coated urea releases nitrogen

- a) Immediately
- b) Slowly
- c) Not at all

d) Randomly

Answer: b) Slowly

66. Neem coating helps reduce

a) Crop yield

b) Soil fertility

c) Groundwater pollution

d) Photosynthesis

Answer: c) Groundwater pollution

67. Which plant part is used to cure scurvy?

a) Amla fruit

b) Neem leaf

c) Ginger root

d) Tulsi stem

Answer: a) Amla fruit

68. Which plant is used as an expectorant?

a) Neem

b) Tulsi

c) Aloe

d) Cotton

Answer: b) Tulsi

69. Aloe vera is mainly used for

a) Timber

b) Fibre

c) Skin treatment

d) Spices

Answer: c) Skin treatment

70. Which plant helps boost immunity?

a) Cotton

b) Pine

c) Tulsi

d) Jute

Answer: c) Tulsi

71. Weaving is done after

a) Harvesting

b) Spinning

c) Knitting

d) Pollination

Answer: b) Spinning

72. Knitting is used to make

- a) Seeds
- b) Fibres
- c) Fabrics
- d) Fertilisers

Answer: c) Fabrics

73. Sunflower depends mainly on

- a) Wind pollination
- b) Water pollination
- c) Insect pollination
- d) Self-pollination

Answer: c) Insect pollination

74. Birds help plants mainly by

- a) Eating leaves
- b) Seed dispersal
- c) Root growth
- d) Soil erosion

Answer: b) Seed dispersal

75. Which plant product is used for making paper pulp?

- a) Cotton
- b) Pine
- c) Jute
- d) Banana

Answer: b) Pine

76. Which timber property helps resist temperature change?

- a) Colour
- b) Texture
- c) Resistance
- d) Moisture content

Answer: c) Resistance

77. Which plant is used as an ornamental plant?

- a) Rice
- b) Wheat
- c) Rose
- d) Cotton

Answer: c) Rose

78. The relationship between plants and animals is

- a) Harmful
- b) One-sided
- c) Mutually beneficial

d) Temporary

Answer: c) Mutually beneficial

79. Which crop is used for tea preparation?

a) Tea plant leaves

b) Tea plant roots

c) Tea plant seeds

d) Tea plant stem

Answer: a) Tea plant leaves

80. Which of the following is an indirect use of plants?

a) Eating fruits

b) Making furniture

c) Feeding livestock

d) Using medicine

Answer: c) Feeding livestock
