

1. What is symmetry?

- a) Having equal sides
- b) Being colourful
- c) Being identical on both sides of a dividing line
- d) Having round shapes

Answer: Option (c) – Being identical on both sides of a dividing line

2. The line that divides an object into two identical halves is called the _____.

- a) Axis of balance
- b) Line of symmetry
- c) Axis of rotation
- d) Line of equality

Answer: Option (b) – Line of symmetry

3. A figure is said to be symmetrical if _____.

- a) Both halves are different
- b) Both halves are identical
- c) One side is larger
- d) It has no sides

Answer: Option (b) – Both halves are identical

4. A line of symmetry divides a figure into _____.

- a) Equal shapes but different sizes
- b) Two mirror-image halves
- c) Two rectangles
- d) Two curved lines

Answer: Option (b) – Two mirror-image halves

5. A square has how many lines of symmetry?

- a) 2
- b) 3
- c) 4
- d) 6

Answer: Option (c) – 4

6. The line of symmetry can be _____.

- a) Only vertical
- b) Only horizontal
- c) Vertical, horizontal, or diagonal

d) Only diagonal

Answer: Option (c) – Vertical, horizontal, or diagonal

7. Which of the following shapes has exactly one line of symmetry?

a) Rectangle

b) Equilateral triangle

c) Isosceles triangle

d) Circle

Answer: Option (c) – Isosceles triangle

8. Which of the following has no line of symmetry?

a) Square

b) Scalene triangle

c) Circle

d) Rectangle

Answer: Option (b) – Scalene triangle

9. A regular polygon has lines of symmetry equal to its _____.

a) Area

b) Perimeter

c) Number of sides

d) Length

Answer: Option (c) – Number of sides

10. Which of the following figures has 2 lines of symmetry?

a) Rectangle

b) Square

c) Circle

d) Oval

Answer: Option (a) – Rectangle

11. A line dividing a figure into identical halves is also called _____.

a) Diagonal line

b) Mirror line

c) Tangent line

d) Axis of tilt

Answer: Option (b) – Mirror line

12. A mirror image shows an object as _____.

a) Rotated 90°

b) Flipped left to right

- c) Enlarged
- d) Upside down

Answer: Option (b) – Flipped left to right

13. The reflection of an image on a mirror is known as _____.

- a) Reflection symmetry
- b) Translational symmetry
- c) Rotational symmetry
- d) Vertical symmetry

Answer: Option (a) – Reflection symmetry

14. Reflection symmetry is also called _____.

- a) Angular symmetry
- b) Mirror symmetry
- c) Translational symmetry
- d) Circular symmetry

Answer: Option (b) – Mirror symmetry

15. A butterfly shows which type of symmetry?

- a) Rotational
- b) Reflection
- c) Translational
- d) No symmetry

Answer: Option (b) – Reflection

16. In reflection symmetry, the mirror line acts as the _____.

- a) Divider
- b) Center of the object
- c) Axis of symmetry
- d) Edge of the shape

Answer: Option (c) – Axis of symmetry

17. The Earth spinning around its axis shows _____.

- a) Translational symmetry
- b) Reflection symmetry
- c) Rotational symmetry
- d) Vertical symmetry

Answer: Option (c) – Rotational symmetry

18. When an object turns about a fixed point, it is said to be _____.

- a) Reflected
- b) Rotated
- c) Translated
- d) Reversed

Answer: Option (b) – Rotated

19. A full rotation is equal to _____.

- a) 90°
- b) 180°
- c) 270°
- d) 360°

Answer: Option (d) – 360°

20. The point about which an object rotates is called _____.

- a) Axis of rotation
- b) Line of rotation
- c) Point of reflection
- d) Mirror line

Answer: Option (a) – Axis of rotation

21. How many 90° turns make a complete rotation?

- a) 2
- b) 3
- c) 4
- d) 5

Answer: Option (c) – 4

22. The number of times an object fits onto itself in one complete rotation is called _____.

- a) Order of rotation
- b) Degree of rotation
- c) Line of symmetry
- d) Reflection number

Answer: Option (a) – Order of rotation

23. A rectangle has an order of rotation equal to _____.

- a) 1
- b) 2

c) 3

d) 4

Answer: Option (b) – 2

24. A square has an order of rotation equal to _____.

a) 1

b) 2

c) 3

d) 4

Answer: Option (d) – 4

25. Which of the following has the highest order of rotation?

a) Rectangle

b) Square

c) Circle

d) Triangle

Answer: Option (c) – Circle

26. Translational symmetry means _____.

a) Repetition by reflection

b) Repetition by rotation

c) Repetition by sliding

d) Repetition by shrinking

Answer: Option (c) – Repetition by sliding

27. In translational symmetry, the object moves _____.

a) Around a point

b) Without changing orientation

c) In opposite directions

d) With rotation

Answer: Option (b) – Without changing orientation

28. When a design repeats itself in a straight line, it shows _____.

a) Reflection symmetry

b) Rotational symmetry

c) Translational symmetry

d) Circular symmetry

Answer: Option (c) – Translational symmetry

29. A shape having all sides equal and all angles equal is called _____.

- a) Irregular polygon
- b) Regular polygon
- c) Complex shape
- d) Oval

Answer: Option (b) – Regular polygon

30. A regular polygon with 5 sides has how many lines of symmetry?

- a) 3
- b) 4
- c) 5
- d) 6

Answer: Option (c) – 5

31. A regular triangle (equilateral triangle) has how many lines of symmetry?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (c) – 3

32. The symbol of a heart has how many lines of symmetry?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (a) – 1

33. Which of the following shapes has infinite lines of symmetry?

- a) Square
- b) Circle
- c) Rectangle
- d) Triangle

Answer: Option (b) – Circle

34. A kite usually has how many lines of symmetry?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (a) – 1

35. A letter 'A' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

36. The letter 'B' has how many lines of symmetry?

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

37. The letter 'H' has how many lines of symmetry?

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (c) – 2

38. The letter 'C' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

39. The letter 'E' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

40. The letter 'X' has _____ line(s) of symmetry.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (b) – 2

41. The letter 'O' has _____ lines of symmetry.

- a) 1
- b) 2
- c) Infinite
- d) None

Answer: Option (c) – Infinite

42. The letter 'Z' has _____ lines of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (a) – 0

43. A rectangle can be divided into two identical halves by _____.

- a) Two lines
- b) One line
- c) Three lines
- d) No lines

Answer: Option (a) – Two lines

44. An equilateral triangle has _____ lines of symmetry.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (c) – 3

45. A regular hexagon has _____ lines of symmetry.

- a) 4
- b) 5
- c) 6
- d) 7

Answer: Option (c) – 6

46. A regular pentagon has _____ lines of symmetry.

- a) 3
- b) 4
- c) 5
- d) 6

Answer: Option (c) – 5

47. A rhombus has _____ lines of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (c) – 2

48. A parallelogram has _____ lines of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (a) – 0

49. Which shape has both reflection and rotational symmetry?

- a) Rectangle
- b) Scalene triangle
- c) Trapezium
- d) Oval

Answer: Option (a) – Rectangle

50. A circle has rotational symmetry of order _____.

- a) 1
- b) 2
- c) Infinite
- d) 4

Answer: Option (c) – Infinite

51. A square has rotational symmetry of order _____.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (d) – 4

52. A rectangle has rotational symmetry of order _____.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (b) – 2

53. A regular pentagon has rotational symmetry of order _____.

- a) 3
- b) 4
- c) 5
- d) 6

Answer: Option (c) – 5

54. A regular hexagon has rotational symmetry of order _____.

- a) 5
- b) 6
- c) 7
- d) 8

Answer: Option (b) – 6

55. The clock hands at 12 o'clock show what kind of symmetry?

- a) Reflection
- b) Rotational
- c) Translational
- d) No symmetry

Answer: Option (b) – Rotational

56. When a pattern slides to a new position without rotation, it shows _____.

- a) Mirror symmetry
- b) Translational symmetry
- c) Rotational symmetry
- d) Irregular symmetry

Answer: Option (b) – Translational symmetry

57. The pattern on a brick wall shows _____ symmetry.

- a) Reflection
- b) Translational
- c) Rotational
- d) No symmetry

Answer: Option (b) – Translational

58. The line of symmetry acts like a _____.

- a) Divider
- b) Mirror
- c) Corner
- d) Edge

Answer: Option (b) – Mirror

59. In rotational symmetry, the object turns around a _____.

- a) Line
- b) Point
- c) Edge
- d) Corner

Answer: Option (b) – Point

60. When a figure is rotated 180° and still looks the same, its order of rotation is at least _____.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (b) – 2

61. The symbol of a starfish shows which kind of symmetry?

- a) Reflection
- b) Rotational
- c) Translational
- d) Both reflection and rotational

Answer: Option (d) – Both reflection and rotational

62. The hands of a fan show _____ symmetry while rotating.

- a) Reflection
- b) Translational
- c) Rotational
- d) Diagonal

Answer: Option (c) – Rotational

63. The wheel of a car shows _____ symmetry.

- a) Translational
- b) Reflection
- c) Rotational
- d) Diagonal

Answer: Option (c) – Rotational

64. A shape that looks the same after half a turn has order of rotation _____.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (b) – 2

65. How many times does a square fit onto itself in one full rotation?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (d) – 4

66. The line of symmetry of a circle can be drawn through _____.

- a) Any point on its boundary
- b) Its center
- c) Its radius only
- d) Its circumference

Answer: Option (b) – Its center

67. Which of these objects has no symmetry?

- a) Scalene triangle
- b) Square
- c) Rectangle
- d) Circle

Answer: Option (a) – Scalene triangle

68. In a butterfly, the line of symmetry passes _____.

- a) Vertically through the middle
- b) Horizontally through the wings
- c) Diagonally through the body
- d) Across the antennae

Answer: Option (a) – Vertically through the middle

69. The letter 'T' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

70. The letter 'M' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

71. The letter 'N' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (a) – 0

72. The letter 'V' has _____ line(s) of symmetry.

- a) 0
- b) 1
- c) 2
- d) 3

Answer: Option (b) – 1

73. Which type of symmetry can a snowflake have?

- a) Rotational only
- b) Reflection only
- c) Both reflection and rotational
- d) None

Answer: Option (c) – Both reflection and rotational

74. How many degrees make a quarter rotation?

- a) 45°
- b) 60°
- c) 90°
- d) 180°

Answer: Option (c) – 90°

75. Which shape does not show rotational symmetry?

- a) Rectangle
- b) Circle
- c) Scalene triangle
- d) Square

Answer: Option (c) – Scalene triangle

76. A figure that repeats itself without rotation or reflection has _____.

- a) Translational symmetry
- b) Mirror symmetry
- c) Angular symmetry
- d) Circular symmetry

Answer: Option (a) – Translational symmetry

77. Which one of the following objects has translational symmetry?

- a) Window
- b) Wallpaper pattern
- c) Triangle
- d) Star

Answer: Option (b) – Wallpaper pattern

78. A regular hexagon has rotational symmetry of order _____.

- a) 3
- b) 4
- c) 5
- d) 6

Answer: Option (d) – 6

79. The reflection of the word “MOM” in a mirror looks _____.

- a) Same as MOM
- b) Like WOW
- c) Like MOM flipped
- d) Like MOM reversed vertically

Answer: Option (a) – Same as MOM

80. The mirror image of “LEFT” looks like _____.

- a) LEFT
- b) FETL
- c) TEFL
- d) TƎꞤ

Answer: Option (d) – TƎꞤ

81. A half-turn is equal to _____.

- a) 45°
- b) 90°
- c) 180°
- d) 270°

Answer: Option (c) – 180°

82. A one-fourth turn equals _____.

- a) 45°
- b) 90°
- c) 180°
- d) 270°

Answer: Option (b) – 90°

83. The design on a chessboard shows _____ symmetry.

- a) Reflection
- b) Rotational
- c) Translational
- d) None

Answer: Option (c) – Translational

84. The line of symmetry divides a shape into _____.

- a) Equal shapes
- b) Unequal shapes
- c) Curved halves
- d) Triangular parts

Answer: Option (a) – Equal shapes

85. In reflection symmetry, the distance of the object from the mirror equals _____.

- a) Half its width
- b) Twice its height
- c) The distance of its image
- d) Zero

Answer: Option (c) – The distance of its image

86. In a square, the diagonal is also a _____.

- a) Line of reflection
- b) Line of symmetry
- c) Axis of rotation
- d) Tangent

Answer: Option (b) – Line of symmetry

87. A circle has how many axes of rotation?

- a) 1
- b) 2
- c) Infinite
- d) 4

Answer: Option (c) – Infinite

88. A regular polygon with 8 sides has how many lines of symmetry?

- a) 4
- b) 6
- c) 8
- d) 10

Answer: Option (c) – 8

89. The triangle with equal sides has how many lines of symmetry?

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (c) – 3

90. A rectangle's rotational symmetry order is _____.

- a) 1
- b) 2
- c) 3
- d) 4

Answer: Option (b) – 2

91. A pattern that repeats diagonally without rotation shows _____.

- a) Reflection symmetry
- b) Translational symmetry
- c) Rotational symmetry
- d) No symmetry

Answer: Option (b) – Translational symmetry

92. Which of the following is not a polygon?

- a) Square
- b) Hexagon
- c) Circle
- d) Triangle

Answer: Option (c) – Circle

93. If all sides of a polygon are equal, it is called _____.

- a) Regular polygon
- b) Irregular polygon
- c) Concave polygon
- d) Unequal polygon

Answer: Option (a) – Regular polygon

94. A regular octagon has how many lines of symmetry?

- a) 6
- b) 7
- c) 8
- d) 9

Answer: Option (c) – 8

95. A regular decagon has _____ lines of symmetry.

- a) 8
- b) 9
- c) 10
- d) 11

Answer: Option (c) – 10

96. Which among the following shows reflection symmetry naturally?

- a) Leaf
- b) Car
- c) Building
- d) Cloud

Answer: Option (a) – Leaf

97. A figure that can be folded into two equal halves has _____.

- a) No symmetry
- b) Line symmetry
- c) Rotational symmetry
- d) Angular symmetry

Answer: Option (b) – Line symmetry

98. The reflection of an object in water shows _____.

- a) Translational symmetry
- b) Reflection symmetry
- c) Rotational symmetry
- d) No symmetry

Answer: Option (b) – Reflection symmetry

99. When an object looks the same after a rotation of 120° , the order of rotation is _____.

- a) 2
- b) 3
- c) 4
- d) 5

Answer: Option (b) – 3

100. Which shape has both reflection and rotational symmetry of order 4?

- a) Square
- b) Rectangle
- c) Triangle
- d) Oval

Answer: Option (a) – Square
