

Sound (8th std)

1. Sound is a form of:

- A) Matter**
- B) Energy**
- C) Light**
- D) Heat**

Answer: B

2. Sound is produced by:

- A) Rotation**
- B) Vibration**
- C) Expansion**
- D) Compression**

Answer: B

3. Sound waves travel through:

- A) Vacuum**
- B) Medium**
- C) Space only**
- D) Light**

Answer: B

4. Example of sound is:

- A) Light**
- B) Heat**
- C) Chirping of birds**
- D) Gravity**

Answer: C

5. Sound helps in:

- A) Sleeping**

B) Communication

C) Eating

D) Walking

Answer: B

6. Vibration is:

A) Circular motion

B) Back-and-forth motion

C) Linear motion

D) Rotational motion

Answer: B

7. Sound is produced when an object:

A) Melts

B) Freezes

C) Vibrates

D) Expands

Answer: C

8. Medium is the substance through which:

A) Light travels

B) Sound travels

C) Heat travels

D) Mass travels

Answer: B

9. Sound cannot travel in:

A) Air

B) Water

C) Vacuum

D) Steel

Answer: C

10.Sound travels fastest in:

A) Gases

B) Liquids

C) Solids

D) Vacuum

Answer: C

11.Speed of sound is:

A) Time taken

B) Distance per second

C) Frequency

D) Amplitude

Answer: B

12.Wavelength is denoted by:

A) v

B) n

C) λ

D) A

Answer: C

13.Unit of wavelength is:

A) Second

B) Meter

C) Hertz

D) Joule

Answer: B

14. Frequency is the number of vibrations per:

- A) Minute**
- B) Hour**
- C) Second**
- D) Day**

Answer: C

15. Unit of frequency is:

- A) Meter**
- B) Joule**
- C) Hertz**
- D) Newton**

Answer: C

16. Frequency is denoted by:

- A) λ**
- B) n**
- C) v**
- D) A**

Answer: B

17. As temperature increases, speed of sound:

- A) Decreases**
- B) Increases**
- C) Remains same**
- D) Stops**

Answer: B

18. Humidity means:

- A) Dry air**
- B) Water vapor in air**

C) Dust

D) Smoke

Answer: B

19.Higher humidity causes speed of sound to:

A) Decrease

B) Increase

C) Stop

D) Fluctuate

Answer: B

20.Compression is a region of:

A) Low pressure

B) High pressure

C) No pressure

D) Vacuum

Answer: B

21.Rarefaction is a region of:

A) High pressure

B) Low pressure

C) Equal pressure

D) No motion

Answer: B

22.Sound wave consists of:

A) Light

B) Compression and rarefaction

C) Heat

D) Electricity

Answer: B

23.Sound wave is a:

- A) Mechanical wave**
- B) Light wave**
- C) Magnetic wave**
- D) Electric wave**

Answer: A

24.Mechanical waves require:

- A) Vacuum**
- B) Medium**
- C) Light**
- D) Energy only**

Answer: B

25.Energy transfer in wave motion involves:

- A) Matter movement**
- B) No movement**
- C) Energy transfer only**
- D) Heat transfer**

Answer: C

26.Particles in wave motion:

- A) Move long distances**
- B) Stay at rest**
- C) Vibrate about mean position**
- D) Disappear**

Answer: C

27.Transverse waves move:

- A) Parallel**
- B) Perpendicular**

- C) Circular
- D) Random

Answer: B

28. Longitudinal waves move:

- A) Perpendicular
- B) Parallel
- C) Circular
- D) Upward

Answer: B

29. Sound waves are:

- A) Transverse
- B) Longitudinal
- C) Circular
- D) Static

Answer: B

30. Example of transverse wave:

- A) Sound
- B) Water waves
- C) Heat
- D) Air

Answer: B

31. Example of longitudinal wave:

- A) Light
- B) Sound
- C) Heat
- D) Electricity

Answer: B

32. Pitch depends on:

- A) Amplitude**
- B) Frequency**
- C) Speed**
- D) Energy**

Answer: B

33. Higher frequency means:

- A) Lower pitch**
- B) Higher pitch**
- C) No pitch**
- D) Same pitch**

Answer: B

34. Amplitude determines:

- A) Pitch**
- B) Loudness**
- C) Speed**
- D) Frequency**

Answer: B

35. Unit of loudness is:

- A) Hertz**
- B) Meter**
- C) Decibel**
- D) Newton**

Answer: C

36. Amplitude is denoted by:

- A) n**
- B) λ**

C) A

D) v

Answer: C

37. Audible range for humans is:

A) 0–100 Hz

B) 20–20000 Hz

C) 100–50000 Hz

D) 10–1000 Hz

Answer: B

38. Infrasonic sound is below:

A) 50 Hz

B) 20 Hz

C) 100 Hz

D) 200 Hz

Answer: B

39. Ultrasonic sound is above:

A) 1000 Hz

B) 2000 Hz

C) 20000 Hz

D) 50000 Hz

Answer: C

40. Humans cannot hear:

A) Audible sounds

B) Ultrasonic sounds

C) Music

D) Speech

Answer: B

41. Animals that hear ultrasonic sounds:

- A) Cats**
- B) Dogs**
- C) Both**
- D) None**

Answer: C

42. Ultrasonic sound is used in:

- A) Cooking**
- B) Sonogram**
- C) Painting**
- D) Farming**

Answer: B

43. SONAR is used to:

- A) Measure heat**
- B) Detect depth**
- C) Measure light**
- D) Detect mass**

Answer: B

44. Reflection of sound is:

- A) Absorption**
- B) Bouncing back**
- C) Refraction**
- D) Transmission**

Answer: B

45. Timbre helps to:

- A) Increase sound**
- B) Differentiate sounds**

C) Reduce sound

D) Stop sound

Answer: B

46. Timbre depends on:

A) Frequency

B) Material

C) Speed

D) Energy

Answer: B

47. Musical sound is:

A) Noise

B) Pleasant sound

C) Loud sound

D) Weak sound

Answer: B

48. Wind instruments produce sound by:

A) Strings

B) Air vibration

C) Striking

D) Heat

Answer: B

49. Example of wind instrument:

A) Guitar

B) Flute

C) Drum

D) Piano

Answer: B

50. Reed instruments use:

- A) Strings**
- B) Bamboo reed**
- C) Air only**
- D) Metal**

Answer: B

51. Example of reed instrument:

- A) Harmonium**
- B) Guitar**
- C) Drum**
- D) Violin**

Answer: A

52. Stringed instruments produce sound by:

- A) Air**
- B) Strings**
- C) Water**
- D) Heat**

Answer: B

53. Example of string instrument:

- A) Flute**
- B) Guitar**
- C) Drum**
- D) Trumpet**

Answer: B

54. Percussion instruments produce sound by:

- A) Blowing**
- B) Striking**

C) Stretching

D) Heating

Answer: B

55.Example of percussion instrument:

A) Drum

B) Flute

C) Violin

D) Saxophone

Answer: A

56.Human sound is produced by:

A) Heart

B) Larynx

C) Brain

D) Lungs

Answer: B

57.Vocal cords are present in:

A) Ear

B) Nose

C) Larynx

D) Mouth

Answer: C

58.Outer ear is called:

A) Canal

B) Pinna

C) Cochlea

D) Drum

Answer: B

59.Eardrum is also called:

- A) Pinna**
- B) Tympanic membrane**
- C) Cochlea**
- D) Nerve**

Answer: B

60.Vibrations reach brain as:

- A) Waves**
- B) Signals**
- C) Energy**
- D) Heat**

Answer: B

61.Noise is:

- A) Pleasant sound**
- B) Unpleasant sound**
- C) Soft sound**
- D) Musical sound**

Answer: B

62.Noise pollution is caused by:

- A) Soft music**
- B) Loud sounds**
- C) Silence**
- D) Air**

Answer: B

63.Example of noise pollution source:

- A) Birds**
- B) Horns**

C) Wind

D) Water

Answer: B

64.Noise can cause:

A) Happiness

B) Stress

C) Energy

D) Strength

Answer: B

65.Long-term noise affects:

A) Taste

B) Hearing

C) Smell

D) Vision

Answer: B

66.Sudden loud noise may cause:

A) Sleep

B) Heart attack

C) Hunger

D) Growth

Answer: B

67.Noise reduces:

A) Strength

B) Concentration

C) Height

D) Weight

Answer: B

68.Noise pollution control includes:

- A) Increasing sound**
- B) Reducing horns**
- C) Burning waste**
- D) Cutting trees**

Answer: B

69.Industries control noise by:

- A) Increasing machines**
- B) Soundproof systems**
- C) Loudspeakers**
- D) Fireworks**

Answer: B

70.Hearing loss occurs when:

- A) Eye damaged**
- B) Ear system damaged**
- C) Nose blocked**
- D) Skin affected**

Answer: B

71.Symptom of hearing loss:

- A) Headache**
- B) Ear ache**
- C) Fever**
- D) Cold**

Answer: B

72.Another symptom of hearing loss:

- A) Hunger**
- B) Ringing in ears**

C) Sleep

D) Sweat

Answer: B

73.Ageing can cause:

A) Strength

B) Hearing loss

C) Growth

D) Energy

Answer: B

74.Untreated ear infections may cause:

A) Strength

B) Hearing loss

C) Height

D) Speed

Answer: B

75.Loud noise can cause:

A) Happiness

B) Hearing loss

C) Growth

D) Energy

Answer: B

76.Brain interprets signals as:

A) Light

B) Sound

C) Heat

D) Motion

Answer: B

77.Sound wave transfers:

- A) Matter**
- B) Energy**
- C) Mass**
- D) Volume**

Answer: B

78.Medium particles do not:

- A) Vibrate**
- B) Move forward permanently**
- C) Transfer energy**
- D) Oscillate**

Answer: B

79.Sound travels in:

- A) Air only**
- B) Water only**
- C) Solids, liquids, gases**
- D) Vacuum only**

Answer: C

80.Example of sound energy:

- A) Rocket launch**
- B) Light bulb**
- C) Fan**
- D) Ice**

Answer: A
