

Statistics

MCQ

1. Statistics is a part of which subject?

- a) History
- b) Geography
- c) Mathematics
- d) Science

Answer: Option (c) – Mathematics

2. Statistics helps us to _____.

- a) Count animals
- b) Collect, organize and understand data
- c) Draw pictures
- d) Learn languages

Answer: Option (b) – Collect, organize and understand data

3. Data means _____.

- a) Collection of information
- b) A single number
- c) A long story
- d) Only pictures

Answer: Option (a) – Collection of information

4. Which of the following is an example of data?

- a) Temperature of each day in a week
- b) A single apple
- c) A name of a country
- d) A paragraph

Answer: Option (a) – Temperature of each day in a week

5. The word “data” refers to _____.

- a) Fictional stories
- b) Collection of facts and figures
- c) Only drawings
- d) Songs and poems

Answer: Option (b) – Collection of facts and figures

6. Which is an example of collecting data?

- a) Measuring height of students

- b) Drawing a triangle
- c) Reading a novel
- d) Painting a wall

Answer: Option (a) – Measuring height of students

7. Why do we collect data?

- a) To waste time
- b) To gain information and make decisions
- c) To memorize numbers
- d) To confuse people

Answer: Option (b) – To gain information and make decisions

8. The government collects data to _____.

- a) Decorate offices
- b) Frame schemes and plans
- c) Make jokes
- d) Build games

Answer: Option (b) – Frame schemes and plans

9. Data collected from the original source is called _____.

- a) Secondary data
- b) Primary data
- c) Rough data
- d) Random data

Answer: Option (b) – Primary data

10. The data collected from another source is called _____.

- a) Primary data
- b) Original data
- c) Secondary data
- d) First-hand data

Answer: Option (c) – Secondary data

11. A teacher collecting a list of absentees in the class is an example of _____.

- a) Secondary data
- b) Primary data
- c) Imaginary data
- d) Graph data

Answer: Option (b) – Primary data

12. A news channel taking information from another news channel is _____.

- a) Secondary data
- b) Primary data
- c) Parallel data
- d) Tertiary data

Answer: Option (a) – Secondary data

13. Primary data is collected _____.

- a) Directly from the source
- b) From books
- c) From newspapers
- d) From friends

Answer: Option (a) – Directly from the source

14. Secondary data is collected _____.

- a) Directly by oneself
- b) By using others' collected information
- c) Without any purpose
- d) From imagination

Answer: Option (b) – By using others' collected information

15. Data must be _____ to understand easily.

- a) Hidden
- b) Organized
- c) Erased
- d) Ignored

Answer: Option (b) – Organized

16. Organizing data means _____.

- a) Mixing the numbers
- b) Arranging data methodically
- c) Writing poems
- d) Forgetting facts

Answer: Option (b) – Arranging data methodically

17. Which of the following helps in organizing data?

- a) Tally marks
- b) Paragraphs
- c) Pictures only

d) Games

Answer: Option (a) – Tally marks

18. What is the purpose of tally marks?

- a) To confuse numbers
- b) To represent data quickly
- c) To erase information
- d) To make designs

Answer: Option (b) – To represent data quickly

19. In tally marks, each group of 5 is shown by _____.

- a) A star
- b) A cross
- c) A strike through four lines
- d) A circle

Answer: Option (c) – A strike through four lines

20. The fifth tally mark crosses the previous _____.

- a) 3 marks
- b) 4 marks
- c) 6 marks
- d) 2 marks

Answer: Option (b) – 4 marks

21. Tally marks are useful because they are _____.

- a) Decorative
- b) Quick to count
- c) Difficult to read
- d) Useless

Answer: Option (b) – Quick to count

22. Tally marks show the _____ of data.

- a) Shape
- b) Frequency
- c) Colour
- d) Size

Answer: Option (b) – Frequency

23. How many tally groups represent 15?

- a) 2
- b) 3
- c) 4

d) 5

Answer: Option (b) – 3

24. The symbol “IIII” represents the number _____.

a) 4

b) 5

c) 6

d) 7

Answer: Option (b) – 5

25. A tally chart helps to _____.

a) Write stories

b) Count quickly

c) Paint graphs

d) Hide data

Answer: Option (b) – Count quickly

26. Pictograph represents data using _____.

a) Lines

b) Pictures

c) Words

d) Equations

Answer: Option (b) – Pictures

27. One picture in a pictograph stands for _____.

a) One item only

b) Many items depending on the scale

c) Always five items

d) Always ten items

Answer: Option (b) – Many items depending on the scale

28. Which method gives a simple visual experience of data?

a) Equations

b) Pictograph

c) Paragraph

d) Table

Answer: Option (b) – Pictograph

29. In the fruit shop example, one full fruit picture represented _____.

a) 1 fruit

b) 5 fruits

c) 10 fruits

d) 20 fruits

Answer: Option (c) – 10 fruits

30. In the same example, half a fruit picture represented _____.

a) 2 fruits

b) 5 fruits

c) 8 fruits

d) 10 fruits

Answer: Option (b) – 5 fruits

31. If 3 pictures each represent 10 apples, total apples = _____.

a) 20

b) 25

c) 30

d) 40

Answer: Option (c) – 30

32. The number of guavas sold ($2\frac{1}{2}$ pictures) equals _____.

a) 15

b) 20

c) 25

d) 30

Answer: Option (c) – 25

33. Pictographs are useful because they are _____.

a) Hard to read

b) Visually attractive and easy

c) Full of numbers

d) Only for adults

Answer: Option (b) – Visually attractive and easy

34. Which of these is an advantage of pictographs?

a) Complicated to draw

b) Need long explanation

c) Easy to analyze

d) Not suitable for numbers

Answer: Option (c) – Easy to analyze

35. Which of the following is another visual way to represent data?

a) Paragraph

b) Bar graph

c) Poem

d) Table only

Answer: Option (b) – Bar graph

36. A bar graph consists of _____.

a) Circles

b) Bars of equal width

c) Lines only

d) Random shapes

Answer: Option (b) – Bars of equal width

37. The height or length of each bar represents the _____.

a) Size of the page

b) Value of data

c) Colour

d) Width

Answer: Option (b) – Value of data

38. A bar graph can be _____.

a) Only horizontal

b) Only vertical

c) Vertical or horizontal

d) Diagonal

Answer: Option (c) – Vertical or horizontal

39. When bars are drawn upright, it is called a _____.

a) Horizontal bar graph

b) Vertical bar graph

c) Simple line graph

d) Pie chart

Answer: Option (b) – Vertical bar graph

40. When bars are drawn sideways, it is a _____.

a) Vertical bar graph

b) Horizontal bar graph

c) Line graph

d) Circle graph

Answer: Option (b) – Horizontal bar graph

41. Bars in a graph should be _____.

a) Of equal width

b) Of different widths

c) Slanted

d) Random

Answer: Option (a) – Of equal width

42. The space between bars should be _____.

a) Unequal

b) Equal

c) Ignored

d) Large

Answer: Option (b) – Equal

43. The x-axis in a bar graph usually represents _____.

a) Variables or categories

b) Time only

c) Random numbers

d) Nothing

Answer: Option (a) – Variables or categories

44. The y-axis in a vertical bar graph represents _____.

a) Colour

b) Frequency or quantity

c) Names

d) Titles

Answer: Option (b) – Frequency or quantity

45. A good bar graph must have a _____.

a) Title

b) Poem

c) Picture

d) Symbol

Answer: Option (a) – Title

46. The title of a bar graph tells us about _____.

a) The person who drew it

b) The data shown in the graph

c) The length of bars

d) The page number

Answer: Option (b) – The data shown in the graph

47. The bars in a bar graph should not _____.

a) Touch each other

b) Be colourful

c) Have names

d) Stand straight

Answer: Option (a) – Touch each other

48. A bar graph helps us to _____.

a) Compare quantities easily

b) Write essays

c) Read poems

d) Play games

Answer: Option (a) – Compare quantities easily

49. The scale in a bar graph shows _____.

a) The units used for measurement

b) The name of bars

c) The colour of bars

d) The height of paper

Answer: Option (a) – The units used for measurement

50. Before drawing a bar graph, we must decide the _____.

a) Colour of bars

b) Scale

c) Paper size

d) Title font

Answer: Option (b) – Scale

51. A scale of 1 cm = 10 students means each 1 cm bar represents _____.

a) 1 student

b) 5 students

c) 10 students

d) 100 students

Answer: Option (c) – 10 students

52. The vertical axis in a bar graph is also called the _____.

a) X-axis

b) Y-axis

c) Z-axis

d) A-axis

Answer: Option (b) – Y-axis

53. The horizontal axis in a bar graph is also called the _____.

a) Y-axis

b) Z-axis

c) X-axis

d) A-axis

Answer: Option (c) – X-axis

54. The bars in a bar graph are drawn on the _____.

a) Table

b) Coordinate axes

c) Notebook lines

d) Randomly

Answer: Option (b) – Coordinate axes

55. Data represented through bars is called a _____.

a) Diagram

b) Bar graph

c) Picture chart

d) Circle graph

Answer: Option (b) – Bar graph

56. Bar graphs are useful for _____.

a) Showing comparison between groups

b) Drawing designs

c) Writing stories

d) Making decorations

Answer: Option (a) – Showing comparison between groups

57. Each bar in a bar graph represents _____.

a) One category or variable

b) All categories

c) A random number

d) A single point

Answer: Option (a) – One category or variable

58. A graph with unequal bar widths is _____.

a) Correct

b) Incorrect

c) Perfect

d) Neat

Answer: Option (b) – Incorrect

59. The base line in a bar graph represents the _____.

a) Zero point

b) Height of the tallest bar

c) Title of graph

d) Colour scheme

Answer: Option (a) – Zero point

60. Bars are drawn at equal distances to make the graph look _____.

a) Beautiful

b) Clear and easy to read

c) Colourful

d) Long

Answer: Option (b) – Clear and easy to read

61. The numerical values are written along the _____.

a) X-axis

b) Y-axis

c) Z-axis

d) Title box

Answer: Option (b) – Y-axis

62. In a vertical bar graph, bars rise _____.

a) Downward

b) Sideways

c) Upward

d) Backward

Answer: Option (c) – Upward

63. In a horizontal bar graph, bars extend _____.

a) Upward

b) Sideways

c) Downward

d) Diagonally

Answer: Option (b) – Sideways

64. A bar graph must always begin with a _____.

a) Story

b) Table of data

c) Colour code

d) Picture

Answer: Option (b) – Table of data

65. To draw a bar graph, the first step is to _____.

a) Collect the data

b) Colour the bars

c) Choose the paper

d) Write the heading

Answer: Option (a) – Collect the data

66. The second step in constructing a bar graph is to _____.

a) Choose a suitable scale

b) Write answers

c) Colour the bars

d) Erase the data

Answer: Option (a) – Choose a suitable scale

67. The third step in constructing a bar graph is to _____.

a) Draw the axes and bars

b) Sing a song

c) Write the poem

d) Count the pictures

Answer: Option (a) – Draw the axes and bars

68. After drawing the bars, we should _____.

a) Label and title the graph

b) Cut the paper

c) Fold the sheet

d) Hide it

Answer: Option (a) – Label and title the graph

69. A bar graph showing monthly rainfall helps to understand _____.

a) Which month received more rain

b) The colour of clouds

c) The type of rain

d) The size of drops

Answer: Option (a) – Which month received more rain

70. The taller the bar, the _____ the quantity.

a) Smaller

b) Greater

c) Same

d) Equal

Answer: Option (b) – Greater

71. The shorter the bar, the _____ the quantity.

a) Smaller

b) Greater

c) Equal

d) Unknown

Answer: Option (a) – Smaller

72. Which graph shows information using pictures instead of bars?

a) Bar graph

b) Pictograph

c) Line graph

d) Pie chart

Answer: Option (b) – Pictograph

73. The collection of students' ages is an example of _____.

a) Data

b) Poem

c) Graph

d) Story

Answer: Option (a) – Data

74. Recording daily temperature is an example of _____.

a) Collecting data

b) Drawing

c) Guessing

d) Writing story

Answer: Option (a) – Collecting data

75. When we represent data in tables, it becomes _____.

a) Hard to read

b) Easy to understand

c) Colourful

d) Hidden

Answer: Option (b) – Easy to understand

76. A tally mark group of 10 will have _____.

a) Two groups of 5

b) One group of 4

c) Three lines

d) Four groups of 2

Answer: Option (a) – Two groups of 5

77. How many tally marks are used to represent the number 17?

a) 3 groups and 2 marks

b) 4 groups and 2 marks

c) 3 groups and 1 mark

d) 2 groups and 4 marks

Answer: Option (b) – 4 groups and 2 marks

78. Tally marks are most useful for _____.

- a) Small data sets
- b) Very large data sets
- c) Non-numerical data
- d) Stories

Answer: Option (a) – Small data sets

79. The number of lines in a tally mark group of 5 is _____.

- a) 3
- b) 4
- c) 5
- d) 6

Answer: Option (c) – 5

80. A half symbol in pictograph means _____.

- a) Half of the represented number
- b) Double the number
- c) One fourth
- d) One full unit

Answer: Option (a) – Half of the represented number

81. Which graph is drawn using rectangles?

- a) Pictograph
- b) Bar graph
- c) Circle graph
- d) Line graph

Answer: Option (b) – Bar graph

82. The difference between the longest and shortest bar shows _____.

- a) Variation in data
- b) Equal values
- c) Colour difference
- d) Bar width

Answer: Option (a) – Variation in data

83. When data is shown with symbols, it is called _____.

- a) Bar graph
- b) Pictograph
- c) Line graph

d) Frequency table

Answer: Option (b) – Pictograph

84. Tally marks use _____ to record frequency.

a) Dots

b) Vertical lines

c) Squares

d) Circles

Answer: Option (b) – Vertical lines

85. The table that shows data with tally marks is called a _____.

a) Frequency table

b) Pictograph

c) Diagram

d) Pie chart

Answer: Option (a) – Frequency table

86. In a frequency table, the last column usually shows _____.

a) Category name

b) Number or total

c) Colour

d) Picture

Answer: Option (b) – Number or total

87. Bar graphs help to show data that is _____.

a) Comparative

b) Alphabetical

c) Decorative

d) Unrelated

Answer: Option (a) – Comparative

88. Each bar in a bar graph should stand on the same _____.

a) Line or base

b) Colour shade

c) Paper corner

d) Scale

Answer: Option (a) – Line or base

89. If 1 picture = 10 cars, then 5 pictures = _____.

a) 20 cars

b) 30 cars

c) 40 cars

d) 50 cars

Answer: Option (d) – 50 cars

90.If a pictograph shows half a symbol, it means _____.

- a) Half of what one symbol represents
- b) Double value
- c) Zero
- d) Five times more

Answer: Option (a) – Half of what one symbol represents

91.Bar graphs and pictographs are both forms of _____.

- a) Data representation
- b) Paragraph writing
- c) Story making
- d) Decoration

Answer: Option (a) – Data representation

92.Which of the following is not a data type?

- a) Primary data
- b) Secondary data
- c) Collected data
- d) Imaginary data

Answer: Option (d) – Imaginary data

93.Primary and secondary data are both types of _____.

- a) Graphs
- b) Data sources
- c) Scales
- d) Charts

Answer: Option (b) – Data sources

94.The main use of statistics is to _____.

- a) Understand and interpret data
- b) Sing songs
- c) Decorate books
- d) Memorize names

Answer: Option (a) – Understand and interpret data

95.Bar graphs are drawn using which instrument?

- a) Compass
- b) Ruler
- c) Divider

d) Protractor

Answer: Option (b) – Ruler

96. The line across the x and y axes meet at _____.

a) Origin

b) End point

c) Corner

d) Midpoint

Answer: Option (a) – Origin

97. Pictographs are most effective for _____.

a) Small data

b) Huge data

c) Complex data

d) Unknown data

Answer: Option (a) – Small data

98. A bar graph of students' favourite colour helps to know _____.

a) Which colour is most liked

b) Which subject is hard

c) Who is absent

d) Who drew the bars

Answer: Option (a) – Which colour is most liked

99. The word "statistics" comes from the Latin word meaning _____.

a) State or political data

b) Number

c) Table

d) Picture

Answer: Option (a) – State or political data

100. In the Statistics, the plural of datum is _____.

a) Datas

b) Data

c) Informations

d) Figures

Answer: Option (b) – Data
