

The Cell

MCQ

1. A cell is the
 - a) Largest unit of life
 - b) Smallest structural unit of life
 - c) Smallest non-living unit
 - d) Only functional unit

Answer: b

2. The study of cells is called
 - a) Zoology
 - b) Botany
 - c) Cell Biology
 - d) Anatomy

Answer: c

3. Cells are compared to bricks because both are
 - a) Non-living
 - b) Microscopic
 - c) Structural and functional units
 - d) Made of the same material

Answer: c

4. Unlike bricks, cells are
 - a) Hard
 - b) Living
 - c) Rectangular
 - d) Artificial

Answer: b

5. New cells are formed from
 - a) Air
 - b) Water

c) Existing cells

d) Minerals

Answer: c

6. Who discovered the cell?

a) Louis Pasteur

b) Anton van Leeuwenhoek

c) Robert Hooke

d) Charles Darwin

Answer: c

7. Robert Hooke discovered cells in

a) 1605

b) 1655

c) 1665

d) 1705

Answer: c

8. Robert Hooke observed cells in

a) Onion peel

b) Leaf

c) Cork

d) Blood

Answer: c

9. The box-like structures seen by Hooke looked like

a) Rooms

b) Stones

c) Honeycomb

d) Fibres

Answer: c

10. Cells are usually seen using

a) Telescope

b) Binoculars

c) Microscope

d) Camera

Answer: c

11. The size of most cells is

a) Macroscopic

b) Microscopic

c) Kilometres

d) Centimetres

Answer: b

12. The approximate diameter of a cell is

a) 1 mm

b) 0.1 mm

c) 0.01 mm

d) 10 mm

Answer: c

13. Human beings consist of

a) Millions of cells

b) Billions of cells

c) Trillions of cells

d) Thousands of cells

Answer: c

14. Organisms are classified based on

a) Colour of cells

b) Shape of cells

c) Number of cells

d) Size of organs

Answer: c

15. Organisms made of a single cell are called

a) Multicellular

b) Complex organisms

- c) Unicellular
- d) Tissue organisms

Answer: c

16. Which of the following is a unicellular organism?

- a) Mango
- b) Human
- c) Yeast
- d) Spirogyra

Answer: c

17. Unicellular organisms are generally

- a) Large
- b) Visible to naked eye
- c) Microscopic
- d) Artificial

Answer: c

18. Multicellular organisms are made up of

- a) One cell
- b) Two cells
- c) Many cells
- d) No cells

Answer: c

19. Multicellular organisms usually begin life as

- a) Many cells
- b) Two cells
- c) A single cell
- d) A tissue

Answer: c

20. Which is a multicellular organism?

- a) Bacteria
- b) Yeast

c) Amoeba

d) Human

Answer: d

21. Amoeba has a

a) Fixed shape

b) Square shape

c) Irregular shape

d) Round shape

Answer: c

22. Paramecium is

a) Spherical

b) Spindle-shaped

c) Flat

d) Cuboidal

Answer: b

23. Muscle cells in humans are

a) Flat

b) Cubical

c) Spindle-shaped

d) Spherical

Answer: c

24. Skin cells are

a) Flat

b) Branched

c) Spindle-shaped

d) Circular

Answer: a

25. Nerve cells are

a) Short and flat

b) Long and branched

- c) Round
- d) Irregular

Answer: b

26. The cell membrane is also called

- a) Nuclear membrane
- b) Plasma membrane
- c) Cell wall
- d) Cytosol

Answer: b

27. Cell membrane mainly controls

- a) Cell colour
- b) Cell shape only
- c) Entry and exit of substances
- d) Cell division

Answer: c

28. Cytoplasm is

- a) Solid
- b) Jelly-like substance
- c) Empty space
- d) Hard structure

Answer: b

29. Cytoplasm lies between

- a) Cell wall and cell membrane
- b) Cell membrane and nucleus
- c) Nucleus and vacuole
- d) Ribosome and ER

Answer: b

30. Cell organelles are present in the

- a) Nucleus
- b) Cell membrane

c) Cytoplasm

d) Cell wall

Answer: c

31. Which organelle produces energy?

a) Ribosome

b) Golgi apparatus

c) Mitochondria

d) Lysosome

Answer: c

32. Ribosomes are responsible for

a) Digestion

b) Respiration

c) Protein synthesis

d) Transport

Answer: c

33. Golgi apparatus helps in

a) Energy production

b) Packaging and secretion

c) Photosynthesis

d) Respiration

Answer: b

34. The nucleus contains

a) RNA only

b) Cytoplasm

c) DNA

d) Proteins only

Answer: c

35. The nucleus is surrounded by

a) Cell wall

b) Plasma membrane

c) Nuclear membrane

d) Cytoplasm

Answer: c

36. Cells without a true nucleus are called

a) Eukaryotic

b) Multicellular

c) Prokaryotic

d) Complex

Answer: c

37. The nucleus of a prokaryotic cell is called

a) True nucleus

b) Nucleolus

c) Nucleoid

d) Chromosome

Answer: c

38. Prokaryotic cells are

a) Larger

b) More complex

c) Smaller and simpler

d) Multicellular

Answer: c

39. Which is a prokaryotic organism?

a) Human

b) Plant

c) Bacteria

d) Animal

Answer: c

40. Cells with a true nucleus are called

a) Prokaryotic

b) Primitive

c) Eukaryotic

d) Simple

Answer: c

41. Eukaryotic cells have

a) No organelles

b) Membrane-bound organelles

c) No nucleus

d) Only nucleoid

Answer: b

42. Which is an example of a eukaryotic cell?

a) Bacteria

b) Blue-green algae

c) Animal cell

d) Virus

Answer: c

43. Plant cells have a

a) Cell wall

b) Chloroplast

c) Large vacuole

d) All of these

Answer: d

44. Animal cells do NOT have

a) Nucleus

b) Cytoplasm

c) Cell membrane

d) Cell wall

Answer: d

45. Chloroplast is responsible for

a) Respiration

b) Digestion

c) Photosynthesis

d) Excretion

Answer: c

46. Vacuole in plant cells is

a) Small

b) Absent

c) Large and central

d) Temporary

Answer: c

47. Animal cell vacuoles are

a) Large

b) Absent

c) Smaller

d) Central

Answer: c

48. 3-D structure of a cell shows

a) Only shape

b) Only size

c) Exact location of organelles

d) Cell colour

Answer: c

49. 3-D view of a cell is useful because it is

a) Colourful

b) Attractive only

c) More realistic

d) Smaller

Answer: c

50. Cells together form

a) Organs only

b) Tissues

c) Organ systems

d) All living organisms

Answer: d
