

The World of Animals

1. Animals are found in which of the following habitats?

- A. Forests**
- B. Oceans**
- C. Deserts**
- D. All of these**

Answer: D. All of these

2. Animals play an important role in maintaining the _____ of nature.

- A. Colour**
- B. Balance**
- C. Size**
- D. Shape**

Answer: B. Balance

3. Biodiversity means the variety of _____.

- A. Stones**
- B. Water bodies**
- C. Living organisms**
- D. Soil types**

Answer: C. Living organisms

4. Biodiversity includes plants, animals, fungi and _____.

- A. Sand**
- B. Microorganisms**
- C. Air**
- D. Rocks**

Answer: B. Microorganisms

5. Bees help plants by the process of _____.

- A. Digestion**
- B. Pollination**
- C. Respiration**

D. Excretion

Answer: B. Pollination

6. A habitat is the place where an organism _____.

A. Sleeps only

B. Lives and grows

C. Travels

D. Hides

Answer: B. Lives and grows

7. Which animal is specially adapted for desert life?

A. Elephant

B. Camel

C. Fish

D. Penguin

Answer: B. Camel

8. Polar bears are adapted to live in _____.

A. Forests

B. Deserts

C. Cold regions

D. Grasslands

Answer: C. Cold regions

9. Fish and crabs live in _____.

A. Water

B. Desert

C. Trees

D. Mountains

Answer: A. Water

10. Animals need _____ for survival in their habitat.

A. Food

B. Shelter

C. Mates

D. All of these

Answer: D. All of these

11. Life on Earth evolved from a _____.

A. Stone

B. Single cell

C. Water drop

D. Rock

Answer: B. Single cell

12. Organisms made of only one cell are called _____.

A. Multicellular organisms

B. Unicellular organisms

C. Plants

D. Animals

Answer: B. Unicellular organisms

13. Unicellular organisms cannot be seen with _____.

A. Microscope

B. Naked eyes

C. Telescope

D. Camera

Answer: B. Naked eyes

14. Unicellular organisms are also called _____.

A. Microorganisms

B. Mammals

C. Reptiles

D. Birds

Answer: A. Microorganisms

15. Which of the following is a unicellular organism?

A. Amoeba

B. Frog

C. Tiger

D. Fish

Answer: A. Amoeba

16. Amoeba moves using _____.

A. Cilia

B. Wings

C. Pseudopodia

D. Legs

Answer: C. Pseudopodia

17. Amoeba digests food in _____.

A. Stomach

B. Food vacuoles

C. Mouth

D. Lungs

Answer: B. Food vacuoles

18. Amoeba respire by _____.

A. Diffusion

B. Lungs

C. Gills

D. Skin

Answer: A. Diffusion

19. Paramecium is commonly found in _____.

A. Desert

B. Freshwater

C. Mountains

D. Soil

Answer: B. Freshwater

20. Paramecium moves with the help of _____.

A. Flagella

B. Cilia

C. Legs

D. Wings

Answer: B. Cilia

21. Paramecium feeds mainly on _____.

A. Sand

B. Bacteria and algae

C. Leaves

D. Soil

Answer: B. Bacteria and algae

22. Euglena moves with the help of _____.

A. Cilia

B. Flagellum

C. Wings

D. Legs

Answer: B. Flagellum

23. Animals made of many cells are called _____.

A. Unicellular organisms

B. Multicellular organisms

C. Microorganisms

D. Bacteria

Answer: B. Multicellular organisms

24. Humans are _____ organisms.

A. Unicellular

B. Multicellular

C. Microscopic

D. Single-celled

Answer: B. Multicellular

25. Which of the following is a multicellular organism?

A. Amoeba

B. Paramecium

C. Frog

D. Euglena

Answer: C. Frog

26. Adaptation helps organisms _____.

A. Sleep

B. Survive in their habitat

C. Change colour

D. Grow faster

Answer: B. Survive in their habitat

27. Fish have a _____ body shape.

A. Round

B. Flat

C. Streamlined

D. Square

Answer: C. Streamlined

28. Fish breathe through _____.

A. Skin

B. Gills

C. Lungs

D. Mouth

Answer: B. Gills

29. Fish bodies are covered with _____.

A. Fur

B. Scales

C. Feathers

D. Skin only

Answer: B. Scales

30. Fish use _____ for swimming.

A. Fins

B. Wings

C. Legs

D. Hands

Answer: A. Fins

31. The tail fin helps fish in _____.

A. Breathing

B. Changing direction

C. Eating

D. Sleeping

Answer: B. Changing direction

32. Frogs are _____ animals.

A. Reptiles

B. Amphibians

C. Mammals

D. Birds

Answer: B. Amphibians

33. Amphibians live in _____.

A. Only water

B. Only land

C. Both land and water

D. Trees

Answer: C. Both land and water

34. Tadpoles breathe through _____.

A. Lungs

B. Gills

C. Skin

D. Nose

Answer: B. Gills

35. Adult frogs breathe through _____.

A. Skin and lungs

B. Gills only

C. Wings

D. Mouth only

Answer: A. Skin and lungs

36. Frogs are _____ blooded animals.

A. Warm

B. Cold

C. Hot

D. Mixed

Answer: B. Cold

37. Lizards belong to the group _____.

A. Birds

B. Reptiles

C. Mammals

D. Amphibians

Answer: B. Reptiles

38. Lizards breathe through _____.

A. Gills

B. Skin

C. Lungs

D. Wings

Answer: C. Lungs

39. Lizards mostly live in _____ regions.

A. Cold

B. Warm

C. Snowy

D. Wet

Answer: B. Warm

40. Lizards mainly feed on _____.

A. Fruits

B. Insects

C. Leaves

D. Seeds

Answer: B. Insects

41. Birds have _____ instead of teeth.

A. Beaks

B. Tongue

C. Lips

D. Gums

Answer: A. Beaks

42. Birds breathe through _____.

A. Skin

B. Lungs

C. Gills

D. Mouth

Answer: B. Lungs

43. Birds have _____ bones which help in flying.

A. Heavy

B. Hollow

C. Thick

D. Solid

Answer: B. Hollow

44. Wings of birds are modified _____.

A. Hind limbs

B. Forelimbs

C. Tail

D. Neck

Answer: B. Forelimbs

45. Feathers help birds in _____.

A. Swimming

B. Flying

C. Digging

D. Climbing

Answer: B. Flying

46. Birds use their tail for _____.

A. Eating

B. Direction control

C. Sleeping

D. Digging

Answer: B. Direction control

47. Strong chest muscles in birds help in _____.

A. Flying

B. Walking

C. Eating

D. Digging

Answer: A. Flying

48. Camels are known as the _____.

A. King of desert

B. Ship of the desert

C. Desert tiger

D. Desert elephant

Answer: B. Ship of the desert

49. Camel stores fat in its _____.

A. Tail

B. Stomach

C. Hump

D. Neck

Answer: C. Hump

50. Camel's long legs help keep its body away from _____.

A. Water

B. Cold air

C. Hot sand

D. Plants

Answer: C. Hot sand

51. Camel produces _____ urine to conserve water.

A. Large amount

B. Little

C. Blue

D. Thick

Answer: B. Little

52. Camel's feet are _____.

A. Sharp

B. Flat and padded

C. Small

D. Thin

Answer: B. Flat and padded

53. Camel's long eyelashes protect its eyes from _____.

A. Rain

B. Sand

C. Snow

D. Light

Answer: B. Sand

54. Camel's nostrils can _____ during sandstorms.

A. Close

B. Grow

C. Open wider

D. Disappear

Answer: A. Close

55. Which organism uses pseudopodia for movement?

A. Paramecium

B. Amoeba

C. Euglena

D. Frog

Answer: B. Amoeba

56. Which organism moves using cilia?

A. Amoeba

B. Euglena

C. Paramecium

D. Frog

Answer: C. Paramecium

57. Which organism moves using a flagellum?

A. Amoeba

B. Euglena

C. Paramecium

D. Fish

Answer: B. Euglena

58. Jellyfish, frogs and humans are examples of _____.

A. Unicellular organisms

B. Multicellular organisms

C. Microorganisms

D. Bacteria

Answer: B. Multicellular organisms

59. The process that helps animals adjust to their environment is called _____.

A. Digestion

B. Adaptation

C. Respiration

D. Growth

Answer: B. Adaptation

60. The strong tail fin of fish helps in _____.

A. Breathing

B. Steering and balance

C. Eating

D. Sleeping

Answer: B. Steering and balance
