

The World of Plants

Multiple Choice Questions (MCQs)

1. Plants help sustain life on Earth by

- a) Producing heat
- b) Giving shelter only
- c) Making food and releasing oxygen
- d) Absorbing oxygen

Answer: c) Making food and releasing oxygen

2. The living world mainly consists of

- a) Plants and soil
- b) Plants and animals
- c) Animals and air
- d) Water and soil

Answer: b) Plants and animals

3. Which of the following is a characteristic of plants?

- a) They cannot reproduce
- b) They depend on animals for food
- c) They prepare their own food
- d) They do not grow

Answer: c) They prepare their own food

4. Which part of the plant is found below the ground?

- a) Stem
- b) Leaf

- c) Root
- d) Flower

Answer: c) Root

5. The two main systems of a plant are

- a) Root and leaf system
- b) Stem and flower system
- c) Root system and shoot system
- d) Leaf and fruit system

Answer: c) Root system and shoot system

6. Roots mainly help the plant by

- a) Making food
- b) Absorbing water and minerals
- c) Producing flowers
- d) Giving oxygen

Answer: b) Absorbing water and minerals

7. The tip of the root is protected by

- a) Root hair
- b) Root cap
- c) Lateral root
- d) Node

Answer: b) Root cap

8. Root hairs are mainly responsible for

- a) Making food

- b) Absorbing water
- c) Holding flowers
- d) Protecting stem

Answer: b) Absorbing water

9. Which roots have one main root?

- a) Fibrous roots
- b) Adventitious roots
- c) Tap roots
- d) Aerial roots

Answer: c) Tap roots

10. Tap root system is mostly found in

- a) Monocot plants
- b) Aquatic plants
- c) Dicot plants
- d) Desert plants

Answer: c) Dicot plants

11. Which plant has a tap root system?

- a) Rice
- b) Wheat
- c) Mango
- d) Grass

Answer: c) Mango

12. Fibrous roots are usually found in

- a) Dicot plants
- b) Monocot plants
- c) Trees only
- d) Shrubs only

Answer: b) Monocot plants

13. Which is an example of fibrous root plant?

- a) Pea
- b) Carrot
- c) Onion
- d) Radish

Answer: c) Onion

14. Roots help prevent soil erosion by

- a) Absorbing sunlight
- b) Binding soil particles
- c) Producing seeds
- d) Making oxygen

Answer: b) Binding soil particles

15. The shoot system includes

- a) Roots only
- b) Stem, leaves, flowers and fruits
- c) Roots and stem

d) Roots and leaves

Answer: b) Stem, leaves, flowers and fruits

16. The main function of stem is to

a) Absorb water

b) Prepare food

c) Support the plant

d) Make seeds

Answer: c) Support the plant

17. Stem helps in transport of

a) Air only

b) Food only

c) Water, minerals and food

d) Oxygen only

Answer: c) Water, minerals and food

18. The flat green part of a leaf is called

a) Petiole

b) Lamina

c) Vein

d) Midrib

Answer: b) Lamina

19. The stalk of the leaf is known as

a) Midrib

b) Vein

- c) Petiole
- d) Lamina

Answer: c) Petiole

20. The central thick vein of a leaf is called

- a) Veinlet
- b) Midrib
- c) Stalk
- d) Margin

Answer: b) Midrib

21. The thin lines on the leaf are

- a) Nodes
- b) Roots
- c) Veins
- d) Buds

Answer: c) Veins

22. The arrangement of veins on a leaf is called

- a) Venation
- b) Photosynthesis
- c) Respiration
- d) Transpiration

Answer: a) Venation

23. Veins help the leaf by

- a) Producing seeds

- b) Carrying water and food
- c) Absorbing oxygen
- d) Holding flowers

Answer: b) Carrying water and food

24. Tiny pores present on leaf surface are

- a) Veins
- b) Stomata
- c) Buds
- d) Nodes

Answer: b) Stomata

25. Stomata help in

- a) Reproduction
- b) Gas exchange
- c) Root growth
- d) Stem support

Answer: b) Gas exchange

26. Loss of water vapour from leaves is called

- a) Respiration
- b) Photosynthesis
- c) Transpiration
- d) Germination

Answer: c) Transpiration

27. The process of making food in plants is

- a) Respiration
- b) Transpiration
- c) Photosynthesis
- d) Germination

Answer: c) Photosynthesis

28. Which is required for photosynthesis?

- a) Oxygen only
- b) Carbon dioxide, water and sunlight
- c) Nitrogen only
- d) Soil only

Answer: b) Carbon dioxide, water and sunlight

29. Which gas is released during photosynthesis?

- a) Carbon dioxide
- b) Nitrogen
- c) Oxygen
- d) Hydrogen

Answer: c) Oxygen

30. Bryophyllum reproduces through

- a) Roots
- b) Flowers
- c) Leaf buds

d) Seeds

Answer: c) Leaf buds

31. Habitat means

a) Food source

b) Shelter only

c) Dwelling place

d) Climate

Answer: c) Dwelling place

32. Freshwater habitat includes

a) Oceans

b) Seas

c) Rivers and ponds

d) Deserts

Answer: c) Rivers and ponds

33. Marine habitat contains

a) Fresh water

b) Salt water

c) No water

d) Ice only

Answer: b) Salt water

34. Forests cover about _____ of Earth's land surface

a) 10%

b) 20%

c) 31%

d) 50%

Answer: c) 31%

35. Which is NOT a type of forest?

a) Tropical

b) Temperate

c) Mountain

d) Desert

Answer: d) Desert

36. Grasslands are dominated by

a) Trees

b) Shrubs

c) Grasses

d) Climbers

Answer: c) Grasses

37. Savanna is an example of

a) Desert

b) Forest

c) Grassland

d) Mountain

Answer: c) Grassland

38. Deserts receive rainfall

a) More than 100 inches

- b) Less than 10 inches
- c) About 50 inches
- d) Only in winter

Answer: b) Less than 10 inches

39. Antarctica is considered a desert because

- a) It is hot
- b) It has sand dunes
- c) It receives very little rainfall
- d) It has no animals

Answer: c) It receives very little rainfall

40. Many desert animals are active at

- a) Morning
- b) Afternoon
- c) Night
- d) Noon

Answer: c) Night

41. Mountains usually have

- a) Hot climate
- b) Cold climate
- c) Wet climate
- d) Dry climate

Answer: b) Cold climate

42. Rocky Mountains are found in

- a) Asia
- b) Africa
- c) North America
- d) Australia

Answer: c) North America

43. Andes Mountains are located in

- a) Europe
- b) South America
- c) Asia
- d) Africa

Answer: b) South America

44. Special features developed by plants are called

- a) Habitats
- b) Modifications
- c) Venation
- d) Transpiration

Answer: b) Modifications

45. Tendrils help plants to

- a) Make food
- b) Absorb water
- c) Climb

d) Reproduce

Answer: c) Climb

46. Leaf tendrils are found in

a) Mango

b) Sweet pea

c) Rice

d) Wheat

Answer: b) Sweet pea

47. Twiners climb by

a) Roots

b) Leaves

c) Stems

d) Flowers

Answer: c) Stems

48. Morning glory is an example of

a) Tendril climber

b) Twiner

c) Shrub

d) Tree

Answer: b) Twiner

49. Thorns help plants by

a) Making food

b) Reducing water loss and protection

c) Absorbing minerals

d) Transporting food

Answer: b) Reducing water loss and protection

50. In *Opuntia*, leaves are modified into

a) Tendrils

b) Broad leaves

c) Spines

d) Flowers

Answer: c) Spines
