

## **Universe and Space**

1. What is the science that studies stars, planets, and celestial bodies called?

- A) Biology
- B) Chemistry
- C) Astronomy
- D) Physics

Answer: C

2. What are objects like stars, planets, and comets called?

- A) Terrestrial objects
- B) Celestial objects
- C) Artificial objects
- D) Natural resources

Answer: B

3. The Sun and celestial bodies revolving around it form the:

- A) Galaxy
- B) Universe
- C) Solar system
- D) Orbit

Answer: C

4. A collection of billions of stars is called:

- A) Planet
- B) Galaxy
- C) Orbit
- D) Satellite

Answer: B

5. Our Sun belongs to which galaxy?

- A) Andromeda
- B) Milky Way
- C) Orion
- D) Centaurus

Answer: B

6. The universe consists of:

- A) Only planets
- B) Only stars
- C) Everything in space
- D) Only galaxies

Answer: C

7. Which of the following is visible to the naked eye?

- A) Satellite
- B) Asteroid
- C) Star
- D) Meteorite

Answer: C

8. Which celestial body is not seen with the naked eye?

- A) Moon
- B) Sun
- C) Stars
- D) Satellites

Answer: D

9. Space research helps us understand:

- A) Ocean currents

B) Earth's climate

C) Soil types

D) Forests

Answer: B

10. A rocket is mainly used to:

A) Travel underwater

B) Propel into space

C) Dig earth

D) Build structures

Answer: B

11. Rockets work based on:

A) Gravity

B) Magnetism

C) Jet propulsion

D) Friction

Answer: C

12. Sounding rockets are used to:

A) Carry passengers

B) Gather scientific data

C) Build satellites

D) Repair spacecraft

Answer: B

13. How many main systems are in a rocket?

A) 2

B) 3

C) 4

D) 5

Answer: C

14. Which system forms the frame of the rocket?

A) Payload system

B) Structural system

C) Guidance system

D) Propulsion system

Answer: B

15. The payload system carries:

A) Fuel

B) Frame

C) Equipment or satellite

D) Engine

Answer: C

16. The guidance system includes:

A) Fuel tanks

B) Sensors and computers

C) Fins

D) Oxidizers

Answer: B

17. Which system produces thrust?

A) Structural

B) Payload

C) Guidance

D) Propulsion

Answer: D

18.A propellant is:

- A) A fuel only
- B) A gas
- C) A mixture of fuel and oxidizer
- D) A solid material

Answer: C

19.Oxidizer provides:

- A) Fuel
- B) Heat
- C) Oxygen
- D) Pressure

Answer: C

20.Example of oxidizer:

- A) Hydrogen
- B) Oxygen
- C) Alcohol
- D) Methane

Answer: B

21.Types of propellants are:

- A) Two
- B) Three
- C) Four
- D) Five

Answer: B

22.Liquid propellants are:

- A) Pre-mixed

B) Mixed in chamber

C) Always solid

D) Not used

Answer: B

23.Example of liquid fuel:

A) Hydrogen

B) Plastic

C) Wood

D) Coal

Answer: A

24.Solid propellants are:

A) Mixed before use

B) Mixed in chamber

C) Only liquid

D) Only gas

Answer: A

25.Once ignited, solid propellants:

A) Can stop easily

B) Cannot be stopped

C) Turn into liquid

D) Freeze

Answer: B

26.Cryogenic propellants are:

A) High temperature gases

B) Liquefied gases at low temperature

C) Solids

D) Plasma

Answer: B

27. Artificial satellites are launched using:

A) Ships

B) Rockets

C) Cars

D) Planes

Answer: B

28. Satellites move due to:

A) Wind

B) Gravity

C) Heat

D) Pressure

Answer: B

29. Rocket moves upward due to:

A) Gravity

B) Air

C) Thrust

D) Water

Answer: C

30. According to Newton's third law:

A) Action = Reaction

B) Energy conserved

C) Mass constant

D) Force zero

Answer: A

31. Multistage rockets are used because:

- A) For decoration
- B) High velocity needed
- C) Reduce cost
- D) Easy design

Answer: B

32. Founder of Indian space program:

- A) C.V. Raman
- B) Vikram Sarabhai
- C) Homi Bhabha
- D) APJ Abdul Kalam

Answer: B

33. ISRO was established in:

- A) 1950
- B) 1962
- C) 1969
- D) 1975

Answer: C

34. First Indian satellite:

- A) INSAT
- B) Aryabhata
- C) Rohini
- D) PSLV

Answer: B

35. Aryabhata was launched in:

- A) 1969

B) 1975

C) 1980

D) 1990

Answer: B

36. Chandrayaan-1 was launched in:

A) 2005

B) 2008

C) 2010

D) 2012

Answer: B

37. Chandrayaan-1 discovered:

A) Gold

B) Water on Moon

C) Oxygen

D) Diamonds

Answer: B

38. Chandrayaan-1 mission duration:

A) 100 days

B) 200 days

C) 312 days

D) 400 days

Answer: C

39. Mangalyaan is related to:

A) Moon

B) Mars

C) Sun

D) Jupiter

Answer: B

40. Mangalyaan launched in:

A) 2010

B) 2013

C) 2015

D) 2018

Answer: B

41. India became which country to reach Mars?

A) First

B) Second

C) Third

D) Fourth

Answer: D

42. Chandrayaan-2 launched in:

A) 2015

B) 2017

C) 2019

D) 2021

Answer: C

43. Chandrayaan-2 targeted:

A) North pole

B) South pole

C) Equator

D) Center

Answer: B

44.Lander of Chandrayaan-2:

- A) Pragyan
- B) Vikram
- C) Aryabhata
- D) Rohini

Answer: B

45.Rover of Chandrayaan-2:

- A) Vikram
- B) Pragyan
- C) PSLV
- D) GSLV

Answer: B

46.Chandrayaan-3 launched in:

- A) 2021
- B) 2022
- C) 2023
- D) 2024

Answer: C

47.NASA stands for:

- A) National Aeronautics and Space Administration
- B) National Air Science Agency
- C) New Aeronautics System
- D) None

Answer: A

48.NASA belongs to:

- A) India

- B) USA
- C) Russia
- D) China

Answer: B

49. Apollo-11 landed on Moon in:

- A) 1965
- B) 1969
- C) 1972
- D) 1980

Answer: B

50. First man on Moon:

- A) Buzz Aldrin
- B) Neil Armstrong
- C) Yuri Gagarin
- D) John Glenn

Answer: B

51. Apollo missions count:

- A) 10
- B) 15
- C) 17
- D) 20

Answer: C

52. Kalpana Chawla was born in:

- A) Delhi
- B) Karnal
- C) Mumbai

D) Chennai

Answer: B

53. Kalpana Chawla joined NASA in:

A) 1985

B) 1988

C) 1990

D) 1995

Answer: B

54. Sunita Williams is:

A) Scientist

B) Astronaut

C) Engineer

D) Doctor

Answer: B

55. Sunita Williams space walk record:

A) 10 hours

B) 20 hours

C) 50+ hours

D) 100 hours

Answer: C

56. Satellite orbit maintained by:

A) Air

B) Gravity

C) Heat

D) Light

Answer: B

57.Fins in rockets provide:

- A) Speed
- B) Stability
- C) Heat
- D) Fuel

Answer: B

58.Payload depends on:

- A) Weather
- B) Mission
- C) Fuel
- D) Size

Answer: B

59.Combustion chamber is part of:

- A) Payload
- B) Guidance
- C) Propulsion
- D) Frame

Answer: C

60.Liquid hydrogen is:

- A) Oxidizer
- B) Fuel
- C) Solid
- D) Gas

Answer: B

61.Nitric acid is used as:

- A) Fuel

B) Oxidizer

C) Frame

D) Gas

Answer: B

62. Polyurethane is:

A) Liquid fuel

B) Solid fuel

C) Gas

D) Oxidizer

Answer: B

63. Cryogenic fuels are stored at:

A) High temp

B) Room temp

C) Low temp

D) Medium temp

Answer: C

64. Rocket thrust must be greater than:

A) Air

B) Weight

C) Heat

D) Speed

Answer: B

65. Clamp holds rocket before:

A) Landing

B) Launch

C) Travel

D) Fueling

Answer: B

66.Satellite needs:

A) Height and speed

B) Only height

C) Only speed

D) Only direction

Answer: A

67.ISRO focuses on:

A) Agriculture

B) Satellites

C) Mining

D) Fishing

Answer: B

68.INCOSPAR formed in:

A) 1950

B) 1962

C) 1970

D) 1980

Answer: B

69.Aryabhata studied:

A) Ocean

B) X-ray astronomy

C) Soil

D) Forest

Answer: B

70.Chandrayaan-1 images count:

- A) 10,000
- B) 20,000
- C) 40,000+
- D) 50,000

Answer: C

71.Mangalyaan reached Mars in:

- A) 2013
- B) 2014
- C) 2015
- D) 2016

Answer: B

72.Mangalyaan is:

- A) Satellite
- B) Rocket
- C) Space probe
- D) Rover

Answer: C

73.Orbiter does:

- A) Lands
- B) Moves on surface
- C) Revolves
- D) Flies

Answer: C

74.Lander does:

- A) Orbit

B) Land

C) Fly

D) Burn

Answer: B

75. Rover does:

A) Orbit

B) Move on surface

C) Fly

D) Burn

Answer: B

76. NASA works with ISRO on:

A) Farming

B) NISAR

C) Roads

D) Mining

Answer: B

77. Van Allen belt crossed by:

A) Aryabhata

B) Chandrayaan

C) Mangalyaan

D) Apollo

Answer: C

78. First Asian country to reach Mars:

A) China

B) Japan

C) India

D) Korea

Answer: C

79. Propellant creates:

A) Heat only

B) Gas pressure

C) Light

D) Sound

Answer: B

80. Guidance system controls:

A) Fuel

B) Path

C) Frame

D) Heat

Answer: B

81. Structural system uses:

A) Wood

B) Steel

C) Lightweight metals

D) Plastic

Answer: C

82. Satellite moves continuously because:

A) No friction

B) Gravity balance

C) Air

D) Light

Answer: B

83. Rocket engine works on:

- A) Push
- B) Pull
- C) Reaction force
- D) Magnetic force

Answer: C

84. First manned mission to Moon orbit:

- A) Apollo-8
- B) Apollo-11
- C) Apollo-13
- D) Apollo-17

Answer: A

85. Chandrayaan-2 orbiter still:

- A) Failed
- B) Working
- C) Lost
- D) Burned

Answer: B

86. Vikram Sarabhai is:

- A) Astronaut
- B) Scientist
- C) Pilot
- D) Engineer

Answer: B

87. PSLV stands for:

- A) Polar Satellite Launch Vehicle

- B) Power Launch Vehicle
- C) Planetary Launch Vehicle
- D) None

Answer: A

88. Rockets carry:

- A) Only fuel
- B) Satellites
- C) Only people
- D) Only gas

Answer: B

89. Gas expelled direction:

- A) Upward
- B) Downward
- C) Sideways
- D) Random

Answer: B

90. Rocket moves:

- A) Downward
- B) Upward
- C) Sideways
- D) Backward

Answer: B

91. Moon surface has many:

- A) Rivers
- B) Mountains
- C) Craters

D) Forests

Answer: C

92. Chandrayaan-1 found caves on:

A) Mars

B) Moon

C) Earth

D) Venus

Answer: B

93. Mars Orbiter Mission duration:

A) 1 year

B) 2 years

C) 3 years

D) 5 years

Answer: C

94. NASA probes visited:

A) Some planets

B) All planets

C) Only Mars

D) Only Moon

Answer: B

95. Satellite used for:

A) Communication

B) Farming

C) Mining

D) Fishing

Answer: A

96.Space exploration helps:

- A) Entertainment
- B) Solve problems
- C) Games
- D) None

Answer: B

97.Rocket needs propellant to:

- A) Float
- B) Move
- C) Stop
- D) Sink

Answer: B

98.Oxidizer reacts with:

- A) Air
- B) Fuel
- C) Water
- D) Metal

Answer: B

99.Universe includes:

- A) Only stars
- B) Only planets
- C) Everything
- D) Only galaxies

Answer: C

100. Astronomy studies:

- A) Earth

B) Oceans

C) Space objects

D) Soil

Answer: C
