

WATER MCQ

1. Water is essential for the survival of living organisms because

- a) one can survive without food but not without water
- b) it tastes good
- c) it is colorful
- d) it is heavy

Correct answer: a) one can survive without food but not without water

2. Water helps regulate the temperature of

- a) our planet and organisms
- b) only rocks
- c) only air
- d) only fire

Correct answer: a) our planet and organisms

3. Sources of water include

- a) rainwater, seawater, rivers
- b) only soil
- c) only clouds
- d) only wind

Correct answer: a) rainwater, seawater, rivers

4. Water in solid form is found as

- a) snow and ice
- b) only liquid
- c) only gas
- d) steam only

Correct answer: a) snow and ice

5. Glaciers are mountains covered by

- a) snow
- b) sand
- c) grass
- d) rocks

Correct answer: a) snow

6. Liquid water is found in

- a) oceans, rivers, lakes
- b) only air

c) only soil

d) fire

Correct answer: a) oceans, rivers, lakes

7. Gaseous form of water is

a) water vapour

b) ice

c) snow

d) rain

Correct answer: a) water vapour

8. Earth is called the Blue planet because

a) two-thirds is covered with water

b) it is blue in color

c) sky is blue

d) oceans are deep

Correct answer: a) two-thirds is covered with water

9. About 97% of earth's water is

a) saline in seas and oceans

b) fresh water

c) ice only

d) underground only

Correct answer: a) saline in seas and oceans

10. Saline water is not suitable for

a) drinking or agriculture

b) swimming only

c) bathing

d) decoration

Correct answer: a) drinking or agriculture

11. Freshwater is obtained from

a) ponds, rivers, tube-wells

b) seas only

c) deserts

d) volcanoes

Correct answer: a) ponds, rivers, tube-wells

12. Of total water, 3% is freshwater, mostly in

a) polar ice caps and glaciers

b) oceans

c) air

d) soil

Correct answer: a) polar ice caps and glaciers

13. Groundwater makes up about

a) 30.1% of freshwater

b) 97%

c) 0.3%

d) 68.7%

Correct answer: a) 30.1% of freshwater

14. Surface water is only

a) 0.3% of total water

b) 97%

c) 3%

d) 68.7%

Correct answer: a) 0.3% of total water

15. In surface water, most is in

a) lakes

b) rivers

c) swamps

d) glaciers

Correct answer: a) lakes

16. Water's chemical formula is

a) H₂O

b) CO₂

c) O₂

d) NaCl

Correct answer: a) H₂O

17. Salinity refers to the quantity of

a) salt in water

b) sugar in water

c) air in water

d) sand in water

Correct answer: a) salt in water

18.The water cycle is also called

- a) hydrological cycle
- b) food cycle
- c) air cycle
- d) rock cycle

Correct answer: a) hydrological cycle

19.The main components of water cycle are sun and

- a) water bodies
- b) soil
- c) plants only
- d) animals

Correct answer: a) water bodies

20.During water cycle, water evaporates due to

- a) sun's heat
- b) moon's light
- c) wind only
- d) cold

Correct answer: a) sun's heat

21.Evaporation converts water to

- a) water vapor
- b) ice
- c) rain
- d) snow

Correct answer: a) water vapor

22.In evaporation, saline water loses its

- a) salts
- b) color
- c) taste
- d) weight

Correct answer: a) salts

23.Transpiration is water release by

- a) plants
- b) animals
- c) rocks

d) clouds

Correct answer: a) plants

24. Condensation changes water vapor to

a) liquid droplets

b) ice

c) gas

d) salt

Correct answer: a) liquid droplets

25. Clouds form due to

a) cooling of water vapor

b) heating

c) wind

d) soil

Correct answer: a) cooling of water vapor

26. Precipitation is water falling as

a) rain, snow, hail

b) vapor

c) ice only

d) gas

Correct answer: a) rain, snow, hail

27. Surface water includes

a) rivers, lakes, ponds

b) underground water

c) ice caps

d) vapor

Correct answer: a) rivers, lakes, ponds

28. Frozen water is 68.7% of

a) freshwater

b) saline water

c) vapor

d) rivers

Correct answer: a) freshwater

29. Groundwater is obtained from

a) wells, tube wells

b) oceans

c) clouds

d) leaves

Correct answer: a) wells, tube wells

30. Water scarcity means decrease due to

a) overuse by plants, animals, humans

b) more rain

c) less sun

d) cold weather

Correct answer: a) overuse by plants, animals, humans

31. Most earth's water is

a) unusable saline water

b) all fresh

c) no groundwater

d) only surface

Correct answer: a) unusable saline water

32. One reason for water scarcity is

a) population explosion

b) less people

c) no buildings

d) more forests

Correct answer: a) population explosion

33. Population growth increases need for

a) houses and freshwater

b) less water

c) no parks

d) more rain

Correct answer: a) houses and freshwater

34. Uneven rainfall causes water issues in

a) deserts

b) rainy places

c) oceans

d) poles

Correct answer: a) deserts

35. Low rainfall leads to low

a) groundwater table

b) oceans

c) vapor

d) ice

Correct answer: a) groundwater table

36. Water pollution makes water

a) unfit for use

b) tastier

c) clearer

d) lighter

Correct answer: a) unfit for use

37. Careless water use causes

a) scarcity

b) more water

c) clean rivers

d) full wells

Correct answer: a) scarcity

38. Water conservation is needed for

a) future generations

b) waste

c) pollution

d) flooding

Correct answer: a) future generations

39. Drip irrigation reduces water

a) wastage in agriculture

b) more use

c) no crops

d) soil dryness

Correct answer: a) wastage in agriculture

40. Rainwater harvesting collects water from

a) rooftops

b) oceans

c) wells

d) pipes only

Correct answer: a) rooftops

41. Rooftop harvesting stores water in

- a) tanks or ground pits
- b) seas
- c) clouds
- d) bottles

Correct answer: a) tanks or ground pits

42. Estuaries are where fresh water meets

- a) seawater
- b) desert
- c) mountains
- d) air

Correct answer: a) seawater

43. Human body needs 2-3 litres of water daily for

- a) temperature regulation
- b) flying
- c) jumping
- d) sleeping only

**Correct answer: a) temperature regulation **

44. Water helps in

- a) digestion and toxin removal
- b) making food
- c) building houses
- d) driving cars

Correct answer: a) digestion and toxin removal

45. Domestic uses of water include

- a) cooking, bathing
- b) farming only
- c) industry
- d) electricity

Correct answer: a) cooking, bathing

46. Agriculture uses water for

- a) crop growth
- b) making clothes
- c) building

d) transport

Correct answer: a) crop growth

47. Industries use water as

a) solvent and for electricity

b) food

c) air

d) soil

Correct answer: a) solvent and for electricity

48. Swamps provide

a) freshwater and oxygen

b) salt only

c) sand

d) rocks

Correct answer: a) freshwater and oxygen

49. Pichavaram Mangroves is an example of

a) swamp

b) ocean

c) desert

d) mountain

Correct answer: a) swamp

50. Water is treated before distribution from

a) rivers or groundwater

b) air

c) fire

d) wind

Correct answer: a) rivers or groundwater

51. Brackish water has

a) some salt, between fresh and sea

b) no salt

c) full salt

d) sugar

Correct answer: a) some salt, between fresh and sea

52. Sprinkler irrigation is a water

a) conservation method

b) wastage method

c) pollution method

d) drying method

Correct answer: a) conservation method

53. Deforestation control helps in water

a) conservation

b) scarcity

c) pollution

d) evaporation

Correct answer: a) conservation

54. Desalination plants make seawater

a) usable

b) saltier

c) frozen

d) vapor

Correct answer: a) usable

55. Coovam is an example of

a) estuary

b) river only

c) lake

d) well

Correct answer: a) estuary

56. Water in human body is 70-95% of

a) cells

b) bones

c) hair

d) nails

**Correct answer: a) cells **

57. Water acts as medium for

a) metabolic reactions

b) sleeping

c) running

d) reading

**Correct answer: a) metabolic reactions **

58. Plants release water by

a) transpiration

- b) eating
- c) sleeping
- d) flying

Correct answer: a) transpiration

59. In water cycle, sun heats earth's

- a) surface
- b) moon
- c) stars
- d) space

Correct answer: a) surface

60. Salts in ocean come from

- a) soil layers and volcanoes
- b) sky
- c) plants
- d) animals

Correct answer: a) soil layers and volcanoes

61. Of lakes in surface water, percent is

- a) 87%
- b) 2%
- c) 11%
- d) 97%

Correct answer: a) 87%

62. Rivers make up percent of surface water

- a) 2%
- b) 87%
- c) 68.7%
- d) 30.1%

Correct answer: a) 2%

63. Swamps are percent of surface water

- a) 11%
- b) 2%
- c) 0.3%
- d) 3%

Correct answer: a) 11%

64. Water scarcity from pollution is due to

- a) toxic wastes
- b) clean air
- c) more rain
- d) less people

Correct answer: a) toxic wastes

65. Recycling used water is

- a) water management
- b) wastage
- c) pollution
- d) evaporation

Correct answer: a) water management

66. Rooftop water needs

- a) filtering
- b) boiling only
- c) no treatment
- d) salt adding

Correct answer: a) filtering

67. Pallikaranai is a

- a) swamp in Chennai
- b) ocean
- c) desert
- d) glacier

Correct answer: a) swamp in Chennai

68. Farmers in India depend on

- a) rains for irrigation
- b) snow
- c) vapor
- d) ice

Correct answer: a) rains for irrigation

69. Water lubricates in body

- a) joints and tracts
- b) eyes only
- c) ears

d) nose

Correct answer: a) joints and tracts

70. Muthupet is a

a) mangrove wetland

b) river

c) lake

d) well

Correct answer: a) mangrove wetland

71. Chembarambakkam is in

a) Kancheepuram

b) sea

c) desert

d) mountain

Correct answer: a) Kancheepuram

72. Brackish water is in

a) swamps sometimes

b) fresh lakes only

c) pure oceans

d) glaciers

Correct answer: a) swamps sometimes

73. Other sources of freshwater are

a) 0.9%

b) 97%

c) 68.7%

d) 30.1%

Correct answer: a) 0.9%

74. Hand pumps access

a) groundwater

b) surface water

c) vapor

d) ice

Correct answer: a) groundwater

75. Chemical fertilizers minimized for

a) less water pollution

b) more wastage

- c) dry soil
- d) no crops

Correct answer: a) less water pollution

76. Awareness prevents throwing wastes in

- a) water bodies
- b) air
- c) soil
- d) fire

Correct answer: a) water bodies

77. Human body regulates temperature by

- a) water
- b) food only
- c) air
- d) sun

Correct answer: a) water

78. Water transports in body

- a) nutrients and waste
- b) rocks
- c) sand
- d) fire

**Correct answer: a) nutrients and waste **

79. Freshwater wetlands are

- a) surface water
- b) groundwater
- c) saline
- d) vapor

Correct answer: a) surface water

80. Open wells give

- a) groundwater
- b) ocean water
- c) rain only
- d) snow

Correct answer: a) groundwater

81. Scarcity increases with

- a) more demand than renewal

- b) less use
- c) no population
- d) even rain

Correct answer: a) more demand than renewal

82. Parks help rainwater

- a) seep into ground
- b) evaporate fast
- c) pollute
- d) freeze

Correct answer: a) seep into ground

83. Deserts have

- a) scanty rainfall
- b) too much rain
- c) oceans
- d) glaciers

Correct answer: a) scanty rainfall

84. Roadside drains in harvesting send water to

- a) ground
- b) sea
- c) air
- d) fire

Correct answer: a) ground

85. Water needs 2-3 litres daily per

- a) person
- b) tree
- c) car
- d) book

Correct answer: a) person

86. Industries need water for

- a) production levels
- b) decoration
- c) color
- d) smell

Correct answer: a) production levels

87. Swamps along rivers have water that is

- a) fresh, brackish or sea
- b) always fresh
- c) always salt
- d) dry

Correct answer: a) fresh, brackish or sea

88. Local bodies distribute water after

- a) treatment
- b) no change
- c) adding salt
- d) heating

Correct answer: a) treatment

89. Springs are source of

- a) groundwater
- b) surface only
- c) vapor
- d) ice

Correct answer: a) groundwater

90. Water cycle makes rainwater

- a) salt-free
- b) salty
- c) cloudy
- d) heavy

Correct answer: a) salt-free

91. Tiny droplets form clouds by

- a) colliding
- b) separating
- c) heating
- d) freezing

Correct answer: a) colliding

92. Plants need water for

- a) photosynthesis
- b) sleeping
- c) flying

d) running

****Correct answer: a) photosynthesis ****

93. Water habitat for over

a) 50% of life on Earth

b) 10%

c) 1%

d) 99%

****Correct answer: a) 50% of life on Earth ****

94. Irrigation efficiency increased by

a) drip and sprinkler

b) flooding

c) no water

d) dry fields

Correct answer: a) drip and sprinkler

95. Golden shower tree wait no, wait that's previous. For water: Domestic wastage reduced by

a) careful use

b) more washing

c) long showers

d) open taps

Correct answer: a) careful use

96. Estuaries home to unique

a) plants and animals

b) rocks

c) sand

d) wind

Correct answer: a) plants and animals

97. Water in blood plasma

a) transfers heat

b) cools air

c) makes food

d) builds muscle

****Correct answer: a) transfers heat ****

98. Transpiration cools

a) plant leaves

b) soil only

c) air only

d) rocks

Correct answer: a) plant leaves

99. Sweating cools human body by

a) evaporation

b) freezing

c) boiling

d) melting

Correct answer: a) evaporation

100. Conservation promotes

a) rainwater harvesting

b) more wastage

c) pollution

d) drying rivers

Correct answer: a) rainwater harvesting
