

Water

MCQ

1. Water is essential for living organisms mainly because

- a) It gives colour
- b) It regulates temperature
- c) It provides food
- d) It produces energy

Answer: b) It regulates temperature

2. Which statement is correct about water and survival?

- a) Humans can live without water
- b) Animals do not need water
- c) Survival without water is impossible
- d) Plants need water only sometimes

Answer: c) Survival without water is impossible

3. Which of the following is NOT a source of water?

- a) River
- b) Pond
- c) Well
- d) Desert sand

Answer: d) Desert sand

4. Snow and ice represent water in which form?

- a) Liquid
- b) Vapour
- c) Solid
- d) Gas

Answer: c) Solid

5. Mountains covered with snow are called

- a) Plateaus
- b) Valleys
- c) Glaciers
- d) Plains

Answer: c) Glaciers

6. Oceans and rivers contain water mainly in

- a) Solid form
- b) Liquid form
- c) Gaseous form
- d) Frozen form

Answer: b) Liquid form

7. Water vapour is found in the

- a) Soil
- b) Ocean
- c) Atmosphere
- d) Rocks

Answer: c) Atmosphere

8. Earth is called the Blue Planet because

- a) It has blue sky
- b) It has oceans
- c) Most of it is covered with water
- d) It reflects sunlight

Answer: c) Most of it is covered with water

9. Approximately how much of Earth's water is saline?

- a) 50%
- b) 70%
- c) 90%
- d) 97%

Answer: d) 97%

10. Saline water is not suitable for drinking because it contains

- a) Oxygen
- b) Minerals
- c) Large amount of salts
- d) Bacteria

Answer: c) Large amount of salts

11. Which water is used for daily human activities?

- a) Saline water
- b) Sea water
- c) Fresh water

d) Brackish water

Answer: c) Fresh water

12. Which source provides fresh water to homes directly?

a) Oceans

b) Taps

c) Seas

d) Estuaries

Answer: b) Taps

13. Only about ____% of water on Earth is fresh water.

a) 10

b) 5

c) 3

d) 1

Answer: c) 3

14. The largest portion of fresh water is found in

a) Rivers

b) Lakes

c) Groundwater

d) Polar ice caps and glaciers

Answer: d) Polar ice caps and glaciers

15. Which source contributes the least to fresh surface water?

a) Lakes

b) Rivers

c) Swamps

d) Glaciers

Answer: b) Rivers

16. Water is chemically composed of

a) Hydrogen and nitrogen

b) Oxygen only

c) Two hydrogen and one oxygen atoms

d) One hydrogen and two oxygen atoms

Answer: c) Two hydrogen and one oxygen atoms

17. The molecular formula of water is

a) HO

b) H_2O

c) H_2O_2

d) O_2H

Answer: b) H_2O

18. The quantity of salt present in water is called

a) Density

b) Hardness

c) Salinity

d) Acidity

Answer: c) Salinity

19. The continuous movement of water between earth and atmosphere is called

a) Nitrogen cycle

b) Carbon cycle

c) Water cycle

d) Oxygen cycle

Answer: c) Water cycle

20. The main source of energy driving the water cycle is

a) Wind

b) Sun

c) Moon

d) Gravity

Answer: b) Sun

21. Conversion of water into water vapour is called

a) Condensation

b) Precipitation

c) Evaporation

d) Transpiration

Answer: c) Evaporation

22. Release of water vapour from plant leaves is known as

a) Respiration

b) Condensation

c) Transpiration

d) Absorption

Answer: c) Transpiration

23. Formation of clouds occurs due to

- a) Evaporation
- b) Condensation
- c) Precipitation
- d) Transpiration

Answer: b) Condensation

24. Falling of rain, snow or hail is called

- a) Evaporation
- b) Condensation
- c) Transpiration
- d) Precipitation

Answer: d) Precipitation

25. During evaporation, saltwater loses

- a) Oxygen
- b) Minerals
- c) Salts
- d) Heat

Answer: c) Salts

26. Rivers, lakes and ponds are examples of

- a) Frozen water
- b) Groundwater
- c) Surface water
- d) Saline water

Answer: c) Surface water

27. Water present below the Earth's surface is called

- a) Surface water
- b) Groundwater
- c) Saline water
- d) Frozen water

Answer: b) Groundwater

28. Tube wells and hand pumps provide

- a) Rainwater
- b) River water
- c) Groundwater

d) Sea water

Answer: c) Groundwater

29. Shortage of water is known as

a) Flood

b) Scarcity

c) Pollution

d) Conservation

Answer: b) Scarcity

30. Which of the following increases water scarcity?

a) Rainwater harvesting

b) Recycling water

c) Population explosion

d) Drip irrigation

Answer: c) Population explosion

31. Uneven distribution of rainfall leads to

a) Water surplus everywhere

b) Equal water availability

c) Water scarcity in some areas

d) No effect

Answer: c) Water scarcity in some areas

32. Dumping wastes into rivers causes

a) Water purification

b) Water pollution

c) Water conservation

d) Water harvesting

Answer: b) Water pollution

33. Which method helps conserve groundwater?

a) Overuse of water

b) Careless use

c) Rainwater harvesting

d) Water pollution

Answer: c) Rainwater harvesting

34. Collecting and storing rainwater is called

a) Irrigation

- b) Evaporation
- c) Rainwater harvesting
- d) Condensation

Answer: c) Rainwater harvesting

35. Rooftop rainwater harvesting mainly helps to

- a) Increase pollution
- b) Refill groundwater
- c) Stop rainfall
- d) Increase salinity

Answer: b) Refill groundwater

36. Which irrigation method saves maximum water?

- a) Flood irrigation
- b) Canal irrigation
- c) Drip irrigation
- d) River irrigation

Answer: c) Drip irrigation

37. Estuaries are places where

- a) Rivers dry up
- b) Seas freeze
- c) Freshwater meets seawater
- d) Groundwater surfaces

Answer: c) Freshwater meets seawater

38. Coovam is an example of a

- a) River
- b) Lake
- c) Estuary
- d) Glacier

Answer: c) Estuary

39. The human body needs about ____ litres of water per day.

- a) 1
- b) 2–3
- c) 5–6
- d) 8–10

Answer: b) 2–3

40. Water helps the human body mainly by

- a) Providing colour
- b) Regulating temperature
- c) Producing blood
- d) Strengthening bones

Answer: b) Regulating temperature

41. Which of the following is a domestic use of water?

- a) Power generation
- b) Irrigation
- c) Washing clothes
- d) Manufacturing

Answer: c) Washing clothes

42. Agriculture mainly depends on

- a) Saline water
- b) Rainwater
- c) Sea water
- d) Distilled water

Answer: b) Rainwater

43. Industries use water mainly as

- a) Decoration
- b) Fuel only
- c) Solvent and coolant
- d) Waste

Answer: c) Solvent and coolant

44. Swamps are examples of

- a) Dry lands
- b) Forested wetlands
- c) Deserts
- d) Mountains

Answer: b) Forested wetlands

45. Pichavaram Mangroves are located in

- a) Kerala
- b) Karnataka
- c) Tamil Nadu

d) Andhra Pradesh

Answer: c) Tamil Nadu

46. Swamps are important because they

a) Pollute water

b) Reduce oxygen

c) Support life

d) Cause floods

Answer: c) Support life

47. Desalination is the process of

a) Adding salt to water

b) Removing salt from seawater

c) Freezing water

d) Polluting water

Answer: b) Removing salt from seawater

48. Water distributed to homes is treated mainly to

a) Increase taste

b) Remove impurities

c) Change colour

d) Add minerals

Answer: b) Remove impurities

49. Careless use of water leads to

a) Water conservation

b) Water abundance

c) Water scarcity

d) Water recycling

Answer: c) Water scarcity

50. Conserving water is important mainly for

a) Present use only

b) Industries

c) Future generations

d) Animals only

Answer: c) Future generations
